Assignment 4

Due on: Fri, Aug 23, 8:00 AM

1. A choreographed movement sequence can be created where two dancers, a leader and a follower, dance together. The leader's movements are coordinated with the follower's.

2. In a choreographed movement sequence, the leader's movements are usually more complex and dynamic compared to the follower's.

3. The role of the leader is often to initiate and guide the sequence, while the follower responds to the leader's movements.

4. A choreographed movement sequence can be used to illustrate the concept of leadership and cooperation in a dance performance.

5. In a choreographed movement sequence, the leader and follower may exchange roles periodically to create a more balanced performance.

6. The choreography of a movement sequence involves the planning of the movements, timing, and spatial arrangement of the dancers.

7. A choreographed movement sequence can be used to explore various aspects of dance, such as rhythm, movement, and expression.
