Assignment 7

1. Write a short note on the importance of materials and metals in ancient India.

2. (a) Describe the characteristics of iron and its uses in ancient India.
   (b) Explain how iron was processed and used in ancient India.

3. (a) Describe the characteristics of copper and its uses in ancient India.
   (b) Explain how copper was processed and used in ancient India.

4. (a) Describe the characteristics of gold and its uses in ancient India.
   (b) Explain how gold was processed and used in ancient India.

5. (a) Describe the characteristics of silver and its uses in ancient India.
   (b) Explain how silver was processed and used in ancient India.

6. (a) Describe the characteristics of zinc and its uses in ancient India.
   (b) Explain how zinc was processed and used in ancient India.

7. (a) Describe the characteristics of lead and its uses in ancient India.
   (b) Explain how lead was processed and used in ancient India.

8. (a) Describe the characteristics of tin and its uses in ancient India.
   (b) Explain how tin was processed and used in ancient India.

9. (a) Describe the characteristics of aluminum and its uses in ancient India.
   (b) Explain how aluminum was processed and used in ancient India.

10. (a) Describe the characteristics of magnesium and its uses in ancient India.
     (b) Explain how magnesium was processed and used in ancient India.

11. (a) Describe the characteristics of calcium and its uses in ancient India.
     (b) Explain how calcium was processed and used in ancient India.

12. (a) Describe the characteristics of sulfur and its uses in ancient India.
     (b) Explain how sulfur was processed and used in ancient India.

13. (a) Describe the characteristics of copper and its uses in ancient India.
     (b) Explain how copper was processed and used in ancient India.

14. (a) Describe the characteristics of mica and its uses in ancient India.
     (b) Explain how mica was processed and used in ancient India.

15. (a) Describe the characteristics of jade and its uses in ancient India.
     (b) Explain how jade was processed and used in ancient India.

16. (a) Describe the characteristics of obsidian and its uses in ancient India.
     (b) Explain how obsidian was processed and used in ancient India.

17. (a) Describe the characteristics of limestone and its uses in ancient India.
     (b) Explain how limestone was processed and used in ancient India.

18. (a) Describe the characteristics of marble and its uses in ancient India.
     (b) Explain how marble was processed and used in ancient India.

19. (a) Describe the characteristics of quartz and its uses in ancient India.
     (b) Explain how quartz was processed and used in ancient India.

20. (a) Describe the characteristics of feldspar and its uses in ancient India.
     (b) Explain how feldspar was processed and used in ancient India.

21. (a) Describe the characteristics of serpentine and its uses in ancient India.
     (b) Explain how serpentine was processed and used in ancient India.

22. (a) Describe the characteristics of garnet and its uses in ancient India.
     (b) Explain how garnet was processed and used in ancient India.

23. (a) Describe the characteristics of andesite and its uses in ancient India.
     (b) Explain how andesite was processed and used in ancient India.

24. (a) Describe the characteristics of diabase and its uses in ancient India.
     (b) Explain how diabase was processed and used in ancient India.

25. (a) Describe the characteristics of quartzite and its uses in ancient India.
     (b) Explain how quartzite was processed and used in ancient India.

26. (a) Describe the characteristics of rhyolite and its uses in ancient India.
     (b) Explain how rhyolite was processed and used in ancient India.

27. (a) Describe the characteristics of basalt and its uses in ancient India.
     (b) Explain how basalt was processed and used in ancient India.

28. (a) Describe the characteristics of gneiss and its uses in ancient India.
     (b) Explain how gneiss was processed and used in ancient India.

29. (a) Describe the characteristics of schist and its uses in ancient India.
     (b) Explain how schist was processed and used in ancient India.

30. (a) Describe the characteristics of porphyry and its uses in ancient India.
     (b) Explain how porphyry was processed and used in ancient India.
