Unit 2: Week 1

Assignment 1
Due on 2019-09-12, 23:59:59

1. Which properties are not a set of vectors?
   - a) Mass
   - b) Velocity
   - c) Force
   - d) Acceleration
   - e) Moment of inertia
   - f) Pressure

2. Which of the following is a unit of vector?
   - a) Mass
   - b) Velocity
   - c) Force
   - d) Acceleration
   - e) Moment of inertia
   - f) Pressure

3. Which of the following is a type of vector?
   - a) Mass
   - b) Velocity
   - c) Force
   - d) Acceleration
   - e) Moment of inertia
   - f) Pressure

4. Which of the following is a type of vector?
   - a) Mass
   - b) Velocity
   - c) Force
   - d) Acceleration
   - e) Moment of inertia
   - f) Pressure

5. Which of the following is a type of vector?
   - a) Mass
   - b) Velocity
   - c) Force
   - d) Acceleration
   - e) Moment of inertia
   - f) Pressure

6. Which of the following is a type of vector?
   - a) Mass
   - b) Velocity
   - c) Force
   - d) Acceleration
   - e) Moment of inertia
   - f) Pressure

7. Which of the following is a type of vector?
   - a) Mass
   - b) Velocity
   - c) Force
   - d) Acceleration
   - e) Moment of inertia
   - f) Pressure

8. Which of the following is a type of vector?
   - a) Mass
   - b) Velocity
   - c) Force
   - d) Acceleration
   - e) Moment of inertia
   - f) Pressure

9. Which of the following is a type of vector?
   - a) Mass
   - b) Velocity
   - c) Force
   - d) Acceleration
   - e) Moment of inertia
   - f) Pressure

10. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

11. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

12. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

13. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

14. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

15. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

16. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

17. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

18. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

19. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

20. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

21. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

22. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

23. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

24. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

25. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

26. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

27. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

28. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

29. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

30. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

31. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

32. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

33. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

34. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

35. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure

36. Which of the following is a type of vector?
    - a) Mass
    - b) Velocity
    - c) Force
    - d) Acceleration
    - e) Moment of inertia
    - f) Pressure
