Assignment 2

The due date for submitting this assignment has passed. As per our records you have not submitted this assignment.

1. The toxicity of a substance ............. be charged but hazard from the substance ........ be alleged.
   - Can, Cannot
   - Can, Can
   - Cannot, Can
   - Cannot, Cannot
   - The answer is incorrect.
   - Score: 0

   Accepted Answers:
   - Cannot, Can

2. The name(s) of different method(s) of exposure to toxic substances in air
   - Inhalation
   - Ingestion
   - Skin contact
   - Injection
   - The answer is incorrect.
   - Score: 0

   Accepted Answers:
   - Inhalation

3. Which chemical compound is systemic toxic?
   - Benzo(a)pyrene
   - Lead
   - Acetone
   - Petrolatum
   - The answer is incorrect.
   - Score: 0

   Accepted Answers:
   - Benzo(a)pyrene

4. Which are the most significant routes of toxic exposure to industrial facilities?
   - Inhalation and evaporation
   - Inhalation and dermal
   - Ingestion and dermal
   - Ingestion and inhalation
   - The answer is incorrect.
   - Score: 0

   Accepted Answers:
   - Inhalation and dermal

5. Which one of 4 phases of exposure to toxic hazards is defined in between 1-3 months then the exposure is referred as.......
   - Acute
   - Subacute
   - Sub chronic
   - Chronic
   - The answer is incorrect.
   - Score: 0

   Accepted Answers:
   - Subchronic

6. Which is the top most of five layers making epidermis of human skin?
   - Stratum Corneum
   - Granular Layer
   - Basal Layer
   - Stratum Lucidum
   - The answer is incorrect.
   - Score: 0

   Accepted Answers:
   - Stratum Lucidum

7. What is the dominant organ for the removal of excretant from body via excretion?
   - Kidney
   - Liver
   - Lungs
   - Skin
   - The answer is incorrect.
   - Score: 0

   Accepted Answers:
   - Kidney

8. What is the dominant organ for the removal of excretant from body via excretion?
   - Kidney
   - Liver
   - Lungs
   - Skin
   - The answer is incorrect.
   - Score: 0

   Accepted Answers:
   - Kidney

9. What are the three major ways for the removal of excretant from body?
   - Inhalation, excretion, evaporation
   - Excretion, dispersion, storage
   - Urinary secretion, excretion, toxic excretion
   - Metabolism, body excretion, secretion
   - The answer is incorrect.
   - Score: 0

   Accepted Answers:
   - Urinary secretion, excretion, toxic excretion

10. What is the what of 5000 ways for the removal of excretant from body?
    - 5000 ways
    - 500 ways
    - 5 ways
    - 50 ways
    - The answer is incorrect.
    - Score: 0

    Accepted Answers:
    - 5 ways
