Assignment 5

1. a. The food material of an undifferentiated mesenchyme is extracellular. (2.0)

b. The food material is extracellular. (2.0)

c. The food material is intracellular. (2.0)

2. a. The food material of an undifferentiated mesenchyme is extracellular. (2.0)

b. The food material is extracellular. (2.0)

c. The food material is intracellular. (2.0)

3. a. The food material of an undifferentiated mesenchyme is extracellular. (2.0)

b. The food material is extracellular. (2.0)

c. The food material is intracellular. (2.0)

4. a. The food material of an undifferentiated mesenchyme is extracellular. (2.0)

b. The food material is extracellular. (2.0)

c. The food material is intracellular. (2.0)

5. a. The food material of an undifferentiated mesenchyme is extracellular. (2.0)

b. The food material is extracellular. (2.0)

c. The food material is intracellular. (2.0)

6. a. The food material of an undifferentiated mesenchyme is extracellular. (2.0)

b. The food material is extracellular. (2.0)

c. The food material is intracellular. (2.0)

7. a. The food material of an undifferentiated mesenchyme is extracellular. (2.0)

b. The food material is extracellular. (2.0)

c. The food material is intracellular. (2.0)

8. a. The food material of an undifferentiated mesenchyme is extracellular. (2.0)

b. The food material is extracellular. (2.0)

c. The food material is intracellular. (2.0)

9. a. The food material of an undifferentiated mesenchyme is extracellular. (2.0)

b. The food material is extracellular. (2.0)

c. The food material is intracellular. (2.0)

10. a. The food material of an undifferentiated mesenchyme is extracellular. (2.0)

b. The food material is extracellular. (2.0)

c. The food material is intracellular. (2.0)

11. a. The food material of an undifferentiated mesenchyme is extracellular. (2.0)

b. The food material is extracellular. (2.0)

c. The food material is intracellular. (2.0)

12. a. The food material of an undifferentiated mesenchyme is extracellular. (2.0)

b. The food material is extracellular. (2.0)

c. The food material is intracellular. (2.0)

13. a. The food material of an undifferentiated mesenchyme is extracellular. (2.0)

b. The food material is extracellular. (2.0)

c. The food material is intracellular. (2.0)

14. a. The food material of an undifferentiated mesenchyme is extracellular. (2.0)

b. The food material is extracellular. (2.0)

c. The food material is intracellular. (2.0)

15. a. The food material of an undifferentiated mesenchyme is extracellular. (2.0)

b. The food material is extracellular. (2.0)

c. The food material is intracellular. (2.0)

16. a. The food material of an undifferentiated mesenchyme is extracellular. (2.0)

b. The food material is extracellular. (2.0)

c. The food material is intracellular. (2.0)
