Assignment 2

Due on BSO-06 15, 9/4/07.

Week 3

Week 2

Assignment 2

Dedicated BSO-06

1. What is the main difference between the two types of learning mechanisms?

2. What is the learning paradigm used in the training dataset? Why?

3. What is the role of the dominant neuron in the training dataset? Why?

4. What is the importance of the learning paradigm used in the training dataset? Why?

5. Describe the main differences between the two types of learning mechanisms.

6. Describe the main differences between the two learning paradigms used in the training dataset.

7. What is the role of the dominant neuron in the training dataset? Why?

8. What is the main difference between the two learning paradigms used in the training dataset?

9. What is the importance of the learning paradigm used in the training dataset? Why?

10. Describe the main differences between the two types of learning mechanisms.

11. Describe the main differences between the two learning paradigms used in the training dataset.

12. What is the role of the dominant neuron in the training dataset? Why?

13. What is the main difference between the two learning paradigms used in the training dataset?

14. What is the importance of the learning paradigm used in the training dataset? Why?
