Unit 2 - Week 0: Prerequisite

Course outline

Due on 2020-01-28, 23:59 IST.

Assignment 0

The due date for submitting this assignment has passed. As per your records you have not submitted this assignment.

1. Consider the following statements: Statement 1: One of the limitations of basic surveying is the study of large areas. Statement 2: Basic surveying is used with higher surveying to better accuracy.
   - Both statement 1 and statement 2 are true
   - Statement 1 is true, statement 2 is false
   - Statement 1 is false, statement 2 is true
   - Statement 1 and statement 2 are not true.
   - No, the answer is not in the options.
   - Accepted Answer:
   - 1 point

2. The information of the 3D coordinates and any additional information about a point is called _________
   - Georeferencing
   - Geometric information
   - Post information
   - Oblique information
   - No, the answer is not in the options.
   - Accepted Answer:
   - 1 point

3. When the following is prepared using geomatics:
   - Topographic maps
   - Maps
   - Maps
   - Raster maps
   - No, the answer is not in the options.
   - Accepted Answer:
   - 1 point

4. Consider the following statements: Statement 1: A chain of reference system is used to establish a reference system. Statement 2: Orientation of reference data is not a prerequisite to establish a reference system.
   - Both statement 1 and statement 2 are true
   - Statement 1 is true, statement 2 is false
   - Statement 1 is false, statement 2 is true
   - Both statement 1 and statement 2 are not true.
   - No, the answer is not in the options.
   - Accepted Answer:
   - 1 point

5. Which of the following is correct regarding statement 1?
   - A rectangular area
   - 2D area
   - 3D area
   - No, the answer is not in the options.
   - Accepted Answer:
   - 1 point

6. Draw a set of reference lines by 300 degrees, then now coordinates of the head point:
   - No, the answer is not in the options.
   - Accepted Answer:
   - 1 point

7. Please consider the following statements: Statement 1: Horizontal control can be established for flat earth. Statement 2: Vertical control can be established for the ellipsoidal surface.
   - Both statement 1 and statement 2 are true
   - Statement 1 is true, statement 2 is false
   - Statement 1 is false, statement 2 is true
   - Both statement 1 and statement 2 are not true.
   - No, the answer is not in the options.
   - Accepted Answer:
   - 1 point

8. What is the name of "Geodetic Surveying"?
   - No, the answer is not in the options.
   - Accepted Answer:
   - 1 point

9. Why do we go by "to walk to path" and also "to part to whole" approach?
   - No, the answer is not in the options.
   - Accepted Answer:
   - 1 point

10. Consider the following statements: Statement 1: Basic surveying can be used for large areas. Statement 2: Basic surveying is used with higher surveying to better accuracy.
    - No, the answer is not in the options.
    - Accepted Answer:
    - 1 point
