Question 1

a) The deflection at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

b) The slope at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

Question 2

a) The deflection at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

b) The slope at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

Question 3

a) The deflection at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

b) The slope at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

Question 4

a) The deflection at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

b) The slope at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

Question 5

a) The deflection at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

b) The slope at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

Question 6

a) The deflection at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

b) The slope at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

Question 7

a) The deflection at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

b) The slope at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

Question 8

a) The deflection at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

b) The slope at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

Question 9

a) The deflection at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

b) The slope at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

Question 10

a) The deflection at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

b) The slope at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

Question 11

a) The deflection at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

b) The slope at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

Question 12

a) The deflection at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

b) The slope at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

Question 13

a) The deflection at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

b) The slope at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

Question 14

a) The deflection at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

b) The slope at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

Question 15

a) The deflection at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

b) The slope at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

Question 16

a) The deflection at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

b) The slope at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

Question 17

a) The deflection at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

b) The slope at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

Question 18

a) The deflection at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

b) The slope at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

Question 19

a) The deflection at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

b) The slope at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

Question 20

a) The deflection at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.

b) The slope at mid-span, the slope of the beam at the supports is 0. The slope of the beam at the supports is 0.
