Assignment 6

1. Describe the impact of the dam on the surrounding ecosystem.

2. Discuss the significance of the dam for water supply.

3. Analyze the potential environmental risks associated with the construction of the dam.

4. Evaluate the social implications of the dam's construction and its operation.

5. Assess the effectiveness of the current management practices for the dam.

6. Propose alternative solutions to address the challenges posed by the dam.

Note: Images are used to illustrate the impact of the dam on the landscape.
