Assignment 5

The due date for submitting this assignment has passed.

As per our record you have not submitted this assignment.

1) Fluvial terraces are formed due to _________ in the alluvial or bedrock.
   Accepted Answers:
   - Deposition
   - Erosion
   - Offset
   - Fractures
   No, the answer is incorrect.
   Score: 0

2) _________ tension are formed due to _________ in the bedrock due to change in the base level.
   Accepted Answers:
   - Depositional, offset
   - Shear, fractures
   - Depositional, erosion
   - Shear, intrusion
   No, the answer is incorrect.
   Score: 0

3) Channel terraces are formed by _________ of the headward-wasting channel.
   Accepted Answers:
   - Deposition
   - Erosion
   - Depositional, erosion
   - Depositional, offset
   No, the answer is incorrect.
   Score: 0

4) In the youth stage of the river one will find the deposition of _________, which is opposite to the characteristics of the river that is more in erosion in nature their depositing.
   No, the answer is incorrect.
   Score: 0

5) _________ streams follows the slope, which developed due to sudden upliftment.
   Accepted Answers:
   - Subsequent
   - Antecedent
   - Consequent
   - Parasitic
   No, the answer is incorrect.
   Score: 0

6) _________ type of drainage pattern is most common in volcanic terrain.
   Accepted Answers:
   - Parallel
   - Radial
   - Centripetic
   - Radial
   No, the answer is incorrect.
   Score: 0

7) _________ drainage pattern is characterized by the circular or concentric paths along the talus of slope rock in areas which are marked by snow or basins.
   Accepted Answers:
   - Annular
   - Tidal
   - Radial
   - Radial
   No, the answer is incorrect.
   Score: 0

8) According to "Simler" stream ordering when second and third order streams then the resulting streams will be in the _________ order.
   Accepted Answers:
   - Second
   - Third
   - First
   No, the answer is incorrect.
   Score: 0

9) The flood hazard zone _________ there is prohibition regarding the development of business and residential complexes within the floodplain and should maintain the river in its natural state.
   Accepted Answers:
   - One
   - Two
   - Three
   - Four
   No, the answer is incorrect.
   Score: 0

10) Lower terraces have _________ lag times between rainfall and flood and are _________ prone to flooding.
    Accepted Answers:
    - Short, less
    - Long, more
    - Long, less
    No, the answer is incorrect.
    Score: 0
