Assignment 3

Unit 5 - Week 3

The rectangular bases of a brick, 25 mm is having an effective depth of 257 mm. The reverse grade in SCI and the grade of reinforcing steel is 415. The reverse grade of SCI and the grade of reinforcing steel in SCI is 415. The reverse grade of a wafer brick is 250 mm is having an effective depth of 257 mm. The reverse grade in SCI and the grade of reinforcing steel is 415. The reverse grade of SCI and the grade of reinforcing steel in SCI is 415. The reverse grade of a wafer brick is 250 mm is having an effective depth of 257 mm. The reverse grade in SCI and the grade of reinforcing steel is 415. The reverse grade of SCI and the grade of reinforcing steel in SCI is 415.

The rectangular bases of a brick, 25 mm is having an effective depth of 257 mm. The reverse grade in SCI and the grade of reinforcing steel is 415. The reverse grade of SCI and the grade of reinforcing steel in SCI is 415. The reverse grade of a wafer brick is 250 mm is having an effective depth of 257 mm. The reverse grade in SCI and the grade of reinforcing steel is 415. The reverse grade of SCI and the grade of reinforcing steel in SCI is 415. The reverse grade of a wafer brick is 250 mm is having an effective depth of 257 mm. The reverse grade in SCI and the grade of reinforcing steel is 415. The reverse grade of SCI and the grade of reinforcing steel in SCI is 415.

The rectangular bases of a brick, 25 mm is having an effective depth of 257 mm. The reverse grade in SCI and the grade of reinforcing steel is 415. The reverse grade of SCI and the grade of reinforcing steel in SCI is 415. The reverse grade of a wafer brick is 250 mm is having an effective depth of 257 mm. The reverse grade in SCI and the grade of reinforcing steel is 415. The reverse grade of SCI and the grade of reinforcing steel in SCI is 415. The reverse grade of a wafer brick is 250 mm is having an effective depth of 257 mm. The reverse grade in SCI and the grade of reinforcing steel is 415. The reverse grade of SCI and the grade of reinforcing steel in SCI is 415. The reverse grade of a wafer brick is 250 mm is having an effective depth of 257 mm. The reverse grade in SCI and the grade of reinforcing steel is 415. The reverse grade of SCI and the grade of reinforcing steel in SCI is 415. The reverse grade of a wafer brick is 250 mm is having an effective depth of 257 mm. The reverse grade in SCI and the grade of reinforcing steel is 415. The reverse grade of SCI and the grade of reinforcing steel in SCI is 415.
