Assignment 8

Which of the following methods is used for habitat的选择 and remediation issues? 2 points

- Radioactivity
- Bioremediation
- Mechanical excavation
- None of the above

The formation of CO2 occurs completely combustion of what? 2 points

- Methane
- Methanol
- Methacrylate
- Methanol

Which of the following is included in the 3 Es of combustion? 2 points

- Temperature
- Enzymatic digestion
- Duration
- All of the above

Which of the following is not one of the phases in combustion processes? 2 points

- Combustible
- Ignition temperature
- Reactor size

What is the purpose of pre-treatment of ash before incineration? 2 points

- To control nils
- To control particulate matter
- To control temperature
- All of the above

Which of the following factor influence ash behaviour? 2 points

- Duct size
- Type of fuel
- Incinerator type
- All of the above

Thermal treatment (or incineration) is a range of processes where temperatures is used to reduce the volume of waste. Which of these is correct? 2 points

- Titan
- Tinfoil

Which of the following is an advanced thermal treatment technique? 2 points

- Incineration
- Pyrolysis
- Plasma systems
- Mass burning
