Assignment 12

1. Locate the following elements in a control of objects:
   a) [Diagram of objects]
   b) [Diagram of objects]
   c) [Diagram of objects]

2. The objects are initially in their correct positions. Objects A, B, C, D, and E are held in place using a fixture. Each object is in its correct location. All objects have the same height and width. The objects are held in place using a fixture. The fixture is attached to the objects. The fixture is located near the objects. The fixture is in contact with the objects. The fixture is used to hold the objects in place.

3. The fixture is removed from the objects. The objects are no longer held in place by the fixture. The objects are free to move. The objects are not in their correct locations. The objects are not in contact with each other. The objects are not in contact with the fixture. The objects are not in contact with any other objects.

4. The objects are in the same positions as they were in the previous step. The objects are not in their correct locations. The objects are not in contact with each other. The objects are not in contact with any other objects.

5. The fixture is attached to the objects. The objects are held in place using a fixture. The fixture is located near the objects. The fixture is in contact with the objects. The fixture is used to hold the objects in place.

6. The fixture is removed from the objects. The objects are no longer held in place by the fixture. The objects are free to move. The objects are not in their correct locations. The objects are not in contact with each other. The objects are not in contact with the fixture. The objects are not in contact with any other objects.

7. The objects are in the same positions as they were in the previous step. The objects are not in their correct locations. The objects are not in contact with each other. The objects are not in contact with any other objects.

8. The objects are in their correct positions. Objects A, B, C, D, and E are held in place using a fixture. Each object is in its correct location. All objects have the same height and width. The objects are held in place using a fixture. The fixture is attached to the objects. The fixture is located near the objects. The fixture is in contact with the objects. The fixture is used to hold the objects in place.
