Unit 12 - Week 10

assignment 10

The due date for submitting this assignment has passed. As per our records you have not submitted this assignment. Due on 2019-04-10, 23:59 IST.

1) If \(\sigma_h, \sigma_v, \sigma'_h, \sigma'_v\) represent the total horizontal stress, total vertical stress, effective horizontal stress and effective vertical stress on a soil element, respectively, the coefficient of earth pressure at rest is given by

\[
\begin{align*}
(a) \quad \frac{\sigma_v}{\sigma_h} & \quad (b) \quad \frac{\sigma_h}{\sigma_v} & \quad (c) \quad \frac{\sigma'_v}{\sigma'_h} & \quad (d) \quad \frac{\sigma'_h}{\sigma'_v}
\end{align*}
\]

No, the answer is incorrect. Score: 0

Accepted Answers: d

2) If the angle of internal friction of a cohesionless soil is 35°, the passive coefficient of earth pressure will be

\[
\begin{align*}
(a) \quad 0.271 & \quad (b) \quad 3.690 & \quad (c) \quad 0.426 & \quad (d) \quad 1.329
\end{align*}
\]

No, the answer is incorrect. Score: 0

Accepted Answers: b
For the soil given in Question No. 2, the ratio of active to passive earth pressure coefficient will be

(a) 0.073  (b) 2.415  (c) 6.451  (d) 13.616

No, the answer is incorrect.
Score: 0
Accepted Answers: 
a

4)
Consider the following statements:
(i) Coulomb’s earth pressure does not take the roughness of wall into consideration
(ii) In case of non – cohesive soils, coefficient of active earth pressure and earth pressure at rest are equal
(iii) Any movement of retaining wall away from the fill corresponds to active earth pressure condition

Of these statements
(a) (i) alone is correct
(b) (i) and (ii) are incorrect
(c) (ii) alone is correct
(d) (iii) alone is incorrect

No, the answer is incorrect.

Accepted Answers: 
b

5)
Two Mohr’s Circles for active and passive case at failure are shown above. Which of the following statement(s) is/are CORRECT?

(i) Point A represents minor principal stress for active earth pressure.
(ii) Point B represents major principal stress for active earth pressure and minor principal stress for passive earth pressure.
(iii) Point C represents major principal stress for passive earth pressure.

(a) only (i) (b) (i) and (ii) (c) all of these (d) none of these

No, the answer is incorrect.
Score: 0
Accepted Answers:
c

6)

An earth-retaining structure may be subjected to the following lateral earth pressures:
(i) Earth pressure at rest
(ii) Passive earth pressure
(iii) Active earth pressure

The correct sequence of the decreasing order of the magnitude of these pressures is

(a) (iii), (ii), (i)
(b) (i), (iii), (ii)
(c) (ii), (i), (iii)
(d) (iii), (i), (ii)

No, the answer is incorrect.
