Week 11: Assignment 11

Due date: 2021-10-13, 23:59 IST.

Problem 1

A. In the following stem-and-leaf diagram, both the stem and leaf values are given in order. The entire data set consists of 100 values. The values range from 10 to 99. There are 3 values that are more than 90.

B. Stem-and-leaf diagrams are used to represent which of the following?

C. Stem-and-leaf diagrams are used to represent which of the following?

D. Stem-and-leaf diagrams are used to represent which of the following?

Problem 2

A. If in any file, the values range from 10 to 99, then the values range from 10 to 99.

B. If in any file, the values range from 10 to 99, then the values range from 10 to 99.

C. If in any file, the values range from 10 to 99, then the values range from 10 to 99.

D. If in any file, the values range from 10 to 99, then the values range from 10 to 99.

Problem 3

The stem-and-leaf diagram of the data set is given below. The data set consists of 100 values. The values range from 10 to 99. There are 3 values that are more than 90.

A. The stem-and-leaf diagram of the data set is given below. The data set consists of 100 values. The values range from 10 to 99. There are 3 values that are more than 90.

B. The stem-and-leaf diagram of the data set is given below. The data set consists of 100 values. The values range from 10 to 99. There are 3 values that are more than 90.

C. The stem-and-leaf diagram of the data set is given below. The data set consists of 100 values. The values range from 10 to 99. There are 3 values that are more than 90.

D. The stem-and-leaf diagram of the data set is given below. The data set consists of 100 values. The values range from 10 to 99. There are 3 values that are more than 90.
