Assignment 4

1. Describe the different types of primary and secondary sources of evidence used in the research. 

2. Explain the importance of peer review in scientific research. 

3. Discuss the ethical considerations involved in conducting research.

4. Evaluate the credibility of a research study based on its methodology.

5. What are the limitations of the research study you have analyzed? How do these limitations affect the results of the study?

6. How could the research study be improved in future research?

7. In what ways can the results of the research study be applied to real-world settings?

8. Why is it important for researchers to communicate their findings effectively?

9. What are the implications of the research study for the field of study?

10. How can you ensure that the research study is replicable by other researchers?
