Assignment 1

The due date for submitting this assignment has passed.

As per our records, you have not submitted this assignment.

1) Who coined the term Artificial Intelligence?
   - Andrew Ng
   - Dafid Hinton
   - John McCarthy
   - Alan Turing
   - No, the answer is incorrect.
   - Score: 0
   - Accepted Answers:
     - John McCarthy

2) Which was the first test proposed to evaluate artificial intelligence?
   - Treharson Posing
   - IQ Test
   - Turing Test
   - Lechaw Pole
   - No, the answer is incorrect.
   - Score: 0
   - Accepted Answers:
     - Lechaw Pole

3) The early AI methods were heavily based upon which of the following?
   - Logic
   - Probability
   - Statistics
   - Reinforcement learning
   - No, the answer is incorrect.
   - Score: 0
   - Accepted Answers:
     - Reinforcement learning

4) Which powerful AI agent established computer domination in the world of chess?
   - DeepMind
   - DeepBlue
   - Watson
   - AlphaBeta
   - No, the answer is incorrect.
   - Score: 0
   - Accepted Answers:
     - DeepBlue

5) Shouting human brain on a scree towards AI corresponds to which of the following problems of AI?
   - Acting like humans
   - Thinking like humans
   - Understanding humans
   - No, the answer is incorrect.
   - Score: 0
   - Accepted Answers:
     - Understanding humans

6) Facebook's AI program that defeated Lee Sedol in the Game of Go.
   - True
   - False
   - No, the answer is incorrect.
   - Score: 0
   - Accepted Answers:
     - False

7) Which of the following schools of thought should be ideal for an agent aimed at assisting a person suffering from depression?
   - Thinking like humans
   - Thinking like insects
   - Thinking like animals
   - Thinking like humans
   - No, the answer is incorrect.
   - Score: 0
   - Accepted Answers:
     - Thinking like animals

8) Which of the following is an example of Artificial Intelligence?
   - Study of animal behavior
   - Program behavior in written text
   - Sparse array stores
   - Random number generator
   - No, the answer is incorrect.
   - Score: 0
   - Accepted Answers:
     - Program behavior in written text

9) Which of the following future is an example of an expert system?
   - Stock market prediction
   - Face recognition
   - Clinical support system
   - Image capturing
   - No, the answer is incorrect.
   - Score: 0
   - Accepted Answers:
     - Image capturing

10) Which of the following can be used to model real-world problems?
     - Increased computational power for the advent of GPUs
     - Numerical optimization and algorithmic efficiency
     - Access to a lot more quality labeled data
     - No, the answer is incorrect.
     - Score: 0
     - Accepted Answers:
       - Increased computational power for the advent of GPUs
       - Numerical optimization and algorithmic efficiency
       - Access to a lot more quality labeled data
