Assignment 4
Due on 2018-06-28, 23:59 IST

1. In a router, the process of setting up a route to a destination can be difficult. One way to simplify this process is to use ___.

2. In a computer, the process of moving data from one place to another is called ___.

3. In a computer, the process of checking for errors in data is called ___.

4. In a computer, the process of manipulating data is called ___.

5. In a computer, the process of controlling the execution of instructions is called ___.

6. In a computer, the process of controlling the flow of data is called ___.

7. In a computer, the process of managing resources is called ___.

8. In a computer, the process of saving data is called ___.

9. In a computer, the process of transferring data is called ___.

10. In a computer, the process of retrieving data is called ___.

11. In a computer, the process of storing data is called ___.

12. In a computer, the process of processing data is called ___.

13. In a computer, the process of transferring data from one device to another is called ___.

14. In a computer, the process of transferring data from one program to another is called ___.

15. In a computer, the process of transferring data from one file to another is called ___.

16. In a computer, the process of transferring data from one device to another is called ___.

17. In a computer, the process of transferring data from one program to another is called ___.

18. In a computer, the process of transferring data from one file to another is called ___.

19. In a computer, the process of transferring data from one device to another is called ___.

20. In a computer, the process of transferring data from one program to another is called ___.

21. In a computer, the process of transferring data from one file to another is called ___.

22. In a computer, the process of transferring data from one device to another is called ___.

23. In a computer, the process of transferring data from one program to another is called ___.

24. In a computer, the process of transferring data from one file to another is called ___.

25. In a computer, the process of transferring data from one device to another is called ___.

26. In a computer, the process of transferring data from one program to another is called ___.

27. In a computer, the process of transferring data from one file to another is called ___.

28. In a computer, the process of transferring data from one device to another is called ___.

29. In a computer, the process of transferring data from one program to another is called ___.

30. In a computer, the process of transferring data from one file to another is called ___.

31. In a computer, the process of transferring data from one device to another is called ___.

32. In a computer, the process of transferring data from one program to another is called ___.

33. In a computer, the process of transferring data from one file to another is called ___.

34. In a computer, the process of transferring data from one device to another is called ___.

35. In a computer, the process of transferring data from one program to another is called ___.

36. In a computer, the process of transferring data from one file to another is called ___.

37. In a computer, the process of transferring data from one device to another is called ___.

38. In a computer, the process of transferring data from one program to another is called ___.

39. In a computer, the process of transferring data from one file to another is called ___.

40. In a computer, the process of transferring data from one device to another is called ___.

41. In a computer, the process of transferring data from one program to another is called ___.

42. In a computer, the process of transferring data from one file to another is called ___.

43. In a computer, the process of transferring data from one device to another is called ___.

44. In a computer, the process of transferring data from one program to another is called ___.

45. In a computer, the process of transferring data from one file to another is called ___.

46. In a computer, the process of transferring data from one device to another is called ___.

47. In a computer, the process of transferring data from one program to another is called ___.

48. In a computer, the process of transferring data from one file to another is called ___.

49. In a computer, the process of transferring data from one device to another is called ___.

50. In a computer, the process of transferring data from one program to another is called ___.

51. In a computer, the process of transferring data from one file to another is called ___.

52. In a computer, the process of transferring data from one device to another is called ___.

53. In a computer, the process of transferring data from one program to another is called ___.

54. In a computer, the process of transferring data from one file to another is called ___.

55. In a computer, the process of transferring data from one device to another is called ___.

56. In a computer, the process of transferring data from one program to another is called ___.

57. In a computer, the process of transferring data from one file to another is called ___.

58. In a computer, the process of transferring data from one device to another is called ___.

59. In a computer, the process of transferring data from one program to another is called ___.

60. In a computer, the process of transferring data from one file to another is called ___.

61. In a computer, the process of transferring data from one device to another is called ___.

62. In a computer, the process of transferring data from one program to another is called ___.

63. In a computer, the process of transferring data from one file to another is called ___.

64. In a computer, the process of transferring data from one device to another is called ___.

65. In a computer, the process of transferring data from one program to another is called ___.

66. In a computer, the process of transferring data from one file to another is called ___.

67. In a computer, the process of transferring data from one device to another is called ___.

68. In a computer, the process of transferring data from one program to another is called ___.

69. In a computer, the process of transferring data from one file to another is called ___.

70. In a computer, the process of transferring data from one device to another is called ___.

71. In a computer, the process of transferring data from one program to another is called ___.

72. In a computer, the process of transferring data from one file to another is called ___.

73. In a computer, the process of transferring data from one device to another is called ___.

74. In a computer, the process of transferring data from one program to another is called ___.

75. In a computer, the process of transferring data from one file to another is called ___.

76. In a computer, the process of transferring data from one device to another is called ___.

77. In a computer, the process of transferring data from one program to another is called ___.

78. In a computer, the process of transferring data from one file to another is called ___.

79. In a computer, the process of transferring data from one device to another is called ___.

80. In a computer, the process of transferring data from one program to another is called ___.

81. In a computer, the process of transferring data from one file to another is called ___.

82. In a computer, the process of transferring data from one device to another is called ___.

83. In a computer, the process of transferring data from one program to another is called ___.

84. In a computer, the process of transferring data from one file to another is called ___.

85. In a computer, the process of transferring data from one device to another is called ___.

86. In a computer, the process of transferring data from one program to another is called ___.

87. In a computer, the process of transferring data from one file to another is called ___.

88. In a computer, the process of transferring data from one device to another is called ___.

89. In a computer, the process of transferring data from one program to another is called ___.

90. In a computer, the process of transferring data from one file to another is called ___.

91. In a computer, the process of transferring data from one device to another is called ___.

92. In a computer, the process of transferring data from one program to another is called ___.

93. In a computer, the process of transferring data from one file to another is called ___.

94. In a computer, the process of transferring data from one device to another is called ___.

95. In a computer, the process of transferring data from one program to another is called ___.

96. In a computer, the process of transferring data from one file to another is called ___.

97. In a computer, the process of transferring data from one device to another is called ___.

98. In a computer, the process of transferring data from one program to another is called ___.

99. In a computer, the process of transferring data from one file to another is called ___.

100. In a computer, the process of transferring data from one device to another is called ___.
