1. What do we do in CG?
   - a. We generate 2D image and display on a screen
   - b. We generate 2D image and display on a screen
   - c. Both a. and b.
   - d. None of these.

   Accepted Answers:
   - a. We generate 2D image and display on a screen

2. What does the video memory do?
   - a. It stores the image in the form of string of 0 and 1, which is generated by display controller.
   - b. It stores the image in the form of string of 0 and 1, which is generated by video controller.
   - c. It stores the images, which is generated by display controller.
   - d. All of the above.

   Accepted Answers:
   - a. It stores the image in the form of string of 0 and 1, which is generated by display controller.

3. Which among the following is correct?
   - a. We can use a raster scan method to render a vector graphics but cannot use a vector scan method to render a raster graphics.
   - b. We can use a vector scan method to render a vector graphics but cannot use a raster scan method to render a vector graphics.
   - c. We can use a raster scan method to render a vector graphics and vice versa.
   - d. We can use any raster scan method to render a raster graphics and only vector scan method to render vector graphics.

   Accepted Answers:
   - c. We can use a raster scan method to render a vector graphics and vice versa

4. Computer graphics are used in mobile phones, information kiosks at popular spots such as airports, ATMs, large displays at open air music concerts, air traffic control panels and so on.
   - a. True
   - b. False

   Accepted Answers:
   - a. True

5. The term “Computer Graphics” was coined in
   - a. 1850
   - b. 1869
   - c. 1900
   - d. 1965

   Accepted Answers:
   - d. 1965

6. The process of removing objects that lie outside view volume is called
   - a. clipping
   - b. projection transformation
   - c. hidden surface removal
   - d. hidden surface detection

   Accepted Answers:
   - c. hidden surface removal

7. How many phases are there in the evolution of computer graphics?
   - a. 1
   - b. 2
   - c. 4
   - d. 10

   Accepted Answers:
   - c. 4

8. How many stages are there in 3D graphics pipeline?
   - a. 1
   - b. 4
   - c. 6
   - d. 5

   Accepted Answers:
   - d. 5

9. The “childhood” phase in the evolution of computer graphics was the period 1964-1976.
   - a. True
   - b. False

   Accepted Answers:
   - a. True

10. First stage of the 3D graphics pipeline is “object representation”.
    - a. True
    - b. False

    Accepted Answers:
    - a. True
