Week 12 Assignment 12

You can earn for completing this assignment has been released. Please see the instructor for more information on how to submit this assignment.

1. Which of the following is not true for Ethernet multiple access CSMA/CD?
   a. Permits different types of traffic to share the same channel.
   b. Permits different types of traffic to share the same channel.
   c. The network frame is transmitted on the Ethernet.
   d. The network frame is transmitted on the Ethernet.

2. What is the common characteristic that sets a network channel on a carrier-based (L) and broadband-DW to a channel?
   a. Both wired and wireless
   b. Both wired and wireless
   c. Both wired and wireless
   d. Both wired and wireless

3. What type of codec can be used with a broadband-DW?
   a. Analog
   b. Analog
   c. Analog
   d. Analog

4. What is the benefit of using a broadband-DW over a carrier-based (L) channel?
   a. Greater bandwidth
   b. Greater bandwidth
   c. Greater bandwidth
   d. Greater bandwidth

5. What is used to create a computer resource sharable?
   a. Share with others
   b. Share with others
   c. Share with others
   d. Share with others

6. What is the capacity of a 10 Mbps Ethernet network?
   a. 1 Mbps
   b. 1 Mbps
   c. 1 Mbps
   d. 1 Mbps

7. What is the security property that a computer system can be modified only by authorized parties?
   a. Integrity
   b. Confidentiality
   c. Availability
   d. Availability

8. Which type of thread is used to permit direct TCP connection between the hosts?
   a. Persistent
   b. Persistent
   c. Persistent
   d. Persistent

9. Which of the following technologies is used to get the maximum bandwidth capability?
   a. Bandwidth
   b. Bandwidth
   c. Bandwidth
   d. Bandwidth

10. Which of the following technologies is used to get the maximum bandwidth capability?
    a. Bandwidth
    b. Bandwidth
    c. Bandwidth
    d. Bandwidth
