Sample solutions (Provided by instructor)

```java
// This is the main class Question
public class Question23{
    public static void main(String[] args) {
        // Object of the main class is created
        Question23 q = new Question23();
        // Print method on object of Question class is called
        q.studentMethod();
    }

    // 'print()' method is defined in class Question
    void print(Question23 object){
        System.out.print("Well Done! ");
    }

    // 'studentMethod()' method is defined in class Question23
    void studentMethod(){
        // Calling a method named 'print()' in class Question23
        print(this);
    }
}
