Assignment 7

Consider the following statement: "A computer is a device that stores information.

Which of the following is a characteristic of computer hardware?

1. Input
2. Output
3. Memory
4. All of the above

Consider the following statement: "Data are facts that can be measured or counted.

Which of the following is a characteristic of data?

1. Accuracy
2. Time
3. Volume
4. All of the above

Consider the following statement: "Information is data that have been interpreted.

Which of the following is a characteristic of information?

1. Context
2. Value
3. Accuracy
4. All of the above

Consider the following statement: "Software is a set of instructions that tell a computer what to do.

Which of the following is a characteristic of software?

1. Custom
2. Generic
3.拿来
4. All of the above

Consider the following statement: "A computer network is a group of computers that are connected together.

Which of the following is a characteristic of a computer network?

1. Efficiency
2. Security
3. Reliability
4. All of the above

Consider the following statement: "Database management systems (DBMS) are software programs that help manage databases.

Which of the following is a characteristic of a DBMS?

1. Data manipulation capabilities
2. Data retrieval capabilities
3. Data sharing capabilities
4. All of the above

Consider the following statement: "A user interface is the way in which software communicates with users.

Which of the following is a characteristic of a user interface?

1. Aesthetic
2. User-friendly
3. Accessible
4. All of the above

Consider the following statement: "A computer virus is a type of malicious software that can infect computer programs.

Which of the following is a characteristic of a computer virus?

1. Replicates itself
2. Causes system crashes
3. Requires user interaction
4. All of the above

Consider the following statement: "Internet security is the practice of protecting computer systems from unauthorized access.

Which of the following is a characteristic of Internet security?

1. Encryption
2. Authentication
3. Access control
4. All of the above

Consider the following statement: "Cloud computing is the delivery of computing services over the Internet.

Which of the following is a characteristic of cloud computing?

1. On-demand accessibility
2. Pay-as-you-go pricing
3. Scalability
4. All of the above

Consider the following statement: "A computer network is a group of computers that are connected together.

Which of the following is a characteristic of a computer network?

1. Efficiency
2. Security
3. Reliability
4. All of the above

Consider the following statement: "Database management systems (DBMS) are software programs that help manage databases.

Which of the following is a characteristic of a DBMS?

1. Data manipulation capabilities
2. Data retrieval capabilities
3. Data sharing capabilities
4. All of the above

Consider the following statement: "A user interface is the way in which software communicates with users.

Which of the following is a characteristic of a user interface?

1. Aesthetic
2. User-friendly
3. Accessible
4. All of the above

Consider the following statement: "A computer virus is a type of malicious software that can infect computer programs.

Which of the following is a characteristic of a computer virus?

1. Replicates itself
2. Causes system crashes
3. Requires user interaction
4. All of the above

Consider the following statement: "Internet security is the practice of protecting computer systems from unauthorized access.

Which of the following is a characteristic of Internet security?

1. Encryption
2. Authentication
3. Access control
4. All of the above

Consider the following statement: "Cloud computing is the delivery of computing services over the Internet.

Which of the following is a characteristic of cloud computing?

1. On-demand accessibility
2. Pay-as-you-go pricing
3. Scalability
4. All of the above
