4. What is the threshold for a given sequence of events? Please provide a clear definition.
5. What is the difference between two events? Please provide an example.
6. What is the relationship between two events? Please provide a graph.
7. What is the threshold for a given sequence of events? Please provide a clear definition.
8. What is the difference between two events? Please provide an example.
9. What is the relationship between two events? Please provide a graph.
10. What is the threshold for a given sequence of events? Please provide a clear definition.
11. What is the difference between two events? Please provide an example.
12. What is the relationship between two events? Please provide a graph.

The following questions are based on the above answers.

13. What is the threshold for a given sequence of events? Please provide a clear definition.
14. What is the difference between two events? Please provide an example.
15. What is the relationship between two events? Please provide a graph.
16. What is the threshold for a given sequence of events? Please provide a clear definition.
17. What is the difference between two events? Please provide an example.
18. What is the relationship between two events? Please provide a graph.
19. What is the threshold for a given sequence of events? Please provide a clear definition.
20. What is the difference between two events? Please provide an example.
21. What is the relationship between two events? Please provide a graph.
