Assignment 5

1. Draw the circuit for a 2-bit full adder.

2. Draw the circuit for a 4-bit full adder.

3. The input inverter in the circuit is labeled as a 2-input NAND gate. Draw the correct output from the circuit when this inverter is replaced with a 2-input NAND gate.

4. In the following diagram, identify the components labeled.

5. In the following diagram, identify the components labeled.

6. In the following diagram, identify the components labeled.

7. In the following diagram, identify the components labeled.

8. In the following diagram, identify the components labeled.

9. In the following diagram, identify the components labeled.

10. In the following diagram, identify the components labeled.

11. In the following diagram, identify the components labeled.

12. In the following diagram, identify the components labeled.

13. In the following diagram, identify the components labeled.

14. In the following diagram, identify the components labeled.

15. In the following diagram, identify the components labeled.

16. In the following diagram, identify the components labeled.

17. In the following diagram, identify the components labeled.

18. In the following diagram, identify the components labeled.

19. In the following diagram, identify the components labeled.

20. In the following diagram, identify the components labeled.

21. In the following diagram, identify the components labeled.

22. In the following diagram, identify the components labeled.

23. In the following diagram, identify the components labeled.

24. In the following diagram, identify the components labeled.

25. In the following diagram, identify the components labeled.

26. In the following diagram, identify the components labeled.

27. In the following diagram, identify the components labeled.

28. In the following diagram, identify the components labeled.

29. In the following diagram, identify the components labeled.

30. In the following diagram, identify the components labeled.

31. In the following diagram, identify the components labeled.

32. In the following diagram, identify the components labeled.

33. In the following diagram, identify the components labeled.

34. In the following diagram, identify the components labeled.

35. In the following diagram, identify the components labeled.

36. In the following diagram, identify the components labeled.

37. In the following diagram, identify the components labeled.

38. In the following diagram, identify the components labeled.

39. In the following diagram, identify the components labeled.

40. In the following diagram, identify the components labeled.

41. In the following diagram, identify the components labeled.

42. In the following diagram, identify the components labeled.

43. In the following diagram, identify the components labeled.

44. In the following diagram, identify the components labeled.

45. In the following diagram, identify the components labeled.

46. In the following diagram, identify the components labeled.

47. In the following diagram, identify the components labeled.

48. In the following diagram, identify the components labeled.

49. In the following diagram, identify the components labeled.

50. In the following diagram, identify the components labeled.
