## Week 7 Assessment

**Due on 2020-11-04, 23.89 IST**

1. Which is the best performance level and the most expensive to pursue for nitrification?  
   - The Filter Deposition (FDP, CLO et al.)  
   - Photobiology.  
   - Characterization  
   - Not the person instructed.  
   - Accepted/Instructed: Photobiology.

2. Review the following statements and choose the correct option:  
   - The FROD response can be used as a BBI signal.  
   - The WROD response can be used as a BBI signal.  
   - The person instructed.  
   - Accepted/Instructed: Photobiology.

3. Which of the following rosettes is explained in the recipe?  
   - Soft-RoP  
   - Acetate  
   - Axolotl  
   - Not the person instructed.  
   - Accepted/Instructed: Soft-RoP.

4. Review the following statements and choose the correct option:  
   - The size of the letters is proportional to the width of the cables.  
   - Online tracking analysis of SSFR can control robots in near-real time.  
   - The person instructed.  
   - Accepted/Instructed: Not the person instructed.

5. Review the following statements and choose the correct option:  
   - Both statements are correct.  
   - Both statements are incorrect.  
   - 5A is correct, 5B is incorrect.  
   - 5B is correct, 5A is incorrect.  
   - Not the person instructed.  
   - Accepted/Instructed: Not the person instructed.

6. Review the following statements and choose the correct option:  
   - Both statements are correct.  
   - Both statements are incorrect.  
   - 5A is correct, 5B is incorrect.  
   - 5B is correct, 5A is incorrect.  
   - Not the person instructed.  
   - Accepted/Instructed: Not the person instructed.

7. Review the following statements and choose the correct option:  
   - Soft-RoP and Hard-Web are two essential steps for quality improvement of any photobiology pathfinder.  
   - Both processes, sample should be delayed.  
   - Not the person instructed.  
   - Accepted/Instructed: Not the person instructed.

8. Review the following statements and choose the correct option:  
   - Both statements are correct.  
   - Both statements are incorrect.  
   - 5A is correct, 5B is incorrect.  
   - 5B is correct, 5A is incorrect.  
   - Not the person instructed.  
   - Accepted/Instructed: Not the person instructed.

9. Review the following statements and choose the correct option:  
   - Both statements are correct.  
   - Both statements are incorrect.  
   - 5A is correct, 5B is incorrect.  
   - 5B is correct, 5A is incorrect.  
   - Not the person instructed.  
   - Accepted/Instructed: Not the person instructed.

10. Review the following statements and choose the correct option:  
    - What is it? (A) Auditory / Visual stimulus?  
    - It’s the brain between two separate cells.  
    - It’s the default of auditory presentation.  
    - It’s the brain of auditory stimuli.  
    - Not the person instructed.  
    - Accepted/Instructed: Not the person instructed.

11. Review the following statements and choose the correct option:  
    - Both statements are correct.  
    - Both statements are incorrect.  
    - 5A is correct, 5B is incorrect.  
    - 5B is correct, 5A is incorrect.  
    - Not the person instructed.  
    - Accepted/Instructed: Not the person instructed.

12. Review the following statements and choose the correct option:  
    - Which is the essential specification of any auditory stimulus?  
    - It’s the brain between two separate cells.  
    - It’s the default of auditory presentation.  
    - It’s the brain of auditory stimuli.  
    - Not the person instructed.  
    - Accepted/Instructed: Not the person instructed.
