   This is an example of the ___
   - pattern recognition
   - bottom-up processing
   - top-down processing
   - sensory-driven processing

   No, the answer is incorrect.
   Accepted Answers provided.

4. We see the figure below as a set of rows rather than columns because the Gestalt principle of ___
   - proximity
   - similarity
   - common fate
   - common region

   No, the answer is incorrect.
   Accepted Answers provided.

5. Which of the following represents a good example of a perceptual stimulus?
   - a book on a shelf
   - a man in outer space
   - a building on the horizon
   - the tilted image formed by a tree

   No, the answer is incorrect.
   Accepted Answers provided.

6. The meaningful interpretation of a perceptual stimulus is called the ___
   - pattern
   - sensation
   - mental set
   - retinal image

   No, the answer is incorrect.
   Accepted Answers provided.

7. The segregation of a whole display into objects and background is known as ___
   - size constancy
   - retinal images
   - bottom-up processing
   - figure-ground organization

   No, the answer is incorrect.
   Accepted Answers provided.

8. All Gestalt principles follow the law of ___
   - closure
   - good continuation
   - proximity
   - common fate

   No, the answer is incorrect.
   Accepted Answers provided.

9. Two principles of Gestalt perception that are not listed above are ___
   - common region
   - importance of experience
   - common region
   - common region

   No, the answer is incorrect.
   Accepted Answers provided.

10. Which of the following is an example of direct perception?
    - connective
    - conceptual
    - bottom-up
    - top-down

    No, the answer is incorrect.
    Accepted Answers provided.
