Psychiatry an Overview - Assignment 1

The due date for submitting this assignment has passed. As per our records you have not submitted this assignment.

Due on 2019-02-13, 23:59 IST.

1) Phrenology was proposed by

- Gall
- Freud
- Golgi
- Purkinje

No, the answer is incorrect.
Score: 0
Accepted Answers:
Gall

2) The "how" and the "why" of human behavior can be studied by

- Psychiatry
- Psychology
- Epigenetics
- Neurobiology

No, the answer is incorrect.
Score: 0
Accepted Answers:
Psychology

3) The brain cells which are the principal current generators for EEG are

- Bipolar Neurons
- Multipolar Neurons
- Pseudo-unipolar Neurons
- Pyramidal Neurons

Score: 0
Accepted Answers:

Frontal Cortex
Frontal cortex, Cerebellum and Basal Ganglia
Frontal Cortex and Cerebellum
Frontal Cortex, Cerebellum and Hippocampus

No, the answer is incorrect.
Score: 0
Accepted Answers:
Frontal cortex, Cerebellum and Basal Ganglia

5) Individual neuronal activity does not directly contribute to the EEG recordings of brain activities.

True
False

No, the answer is incorrect.
Score: 0
Accepted Answers:
True

6) The process of memory consolidation in the brain follows which pathway?

Encoding → Interference → Reverberation → Amplification → Storage
Encoding → Amplification → Reverberation → Interference → Storage
Encoding → Reverberation → Amplification → Interference → Storage
Encoding → Reverberation → Interference → Amplification → Storage

No, the answer is incorrect.
Score: 0
Accepted Answers:
Encoding → Interference → Reverberation → Amplification → Storage

7) Monoaminergic System regulates which of the following?

Mood
Mood and Hunger
Mood, Hunger and Sleep
Mood, Hunger, Sleep and Arousal

No, the answer is incorrect.
Score: 0
Accepted Answers:
Mood, Hunger, Sleep and Arousal

8) MRI technique gives important information about metabolic activity in the brain.

True
False

No, the answer is incorrect.
Score: 0
Accepted Answers:
False

9) Damage to white matter in the brain can be detected using?

Electroencephalogram
10. The school of psychology which is being revived by the recent neurobiological and neurophysiological findings related to behaviour is:

- Structuralism
- Psychoanalysis
- Behaviorism
- Gestalt Psychology

No, the answer is incorrect.
Score: 0

Accepted Answers:
- Psychoanalysis
