Assignment 0 (Only for self-assessment, not for grading)

The due date for submitting this assignment has passed.
As you can see, you have not submitted this assignment.

1) Psychosynthesis is a field that
1. focuses on the study of functions that are commonly associated with common senses.
2. involves the common sense abilities of human behavior as scientific.
3. rationalizes the assumptions made by common sense about human behavior.
4. applies scientific research to understand human behavior.

No. the answer is incorrect.
Score: 0

Accepted Answers:
- 1.

2) Any human will seek out pleasant things over unpleasant things. This statement refers to as:
1. Love of effort
2. The pleasure principle
3. Principle of associationism
4. Metabolism of behaviorism

No. the answer is incorrect.
Score: 0

Accepted Answers:
- 2.

3) Cognitive science is basically about:
1. Representation structures in the mind and its computational correlates.
2. Applying information processing approach to study mental processes.
3. Detecting people’s behavior by in vivo observation.
4. Both a and c

No. the answer is incorrect.
Score: 0

Accepted Answers:
- 2, 4.

4) An extreme position that rules out discussion of anything but observable events and writes in our accounts of behavior:
1. Behaviorism
2. Determinism
3. Logical Behaviorism
4. Central identity theory

No. the answer is incorrect.
Score: 0

Accepted Answers:
- 1.

5) The optimal level of a human being's body functioning is referred to as:
1. Homoerotic
2. Homocentric
3. Homoallergic
4. Homocureptic

No. the answer is incorrect.
Score: 0

Accepted Answers:
- 2.

6) The two hemispheres of the brain are connected by a bundle of neural fibres called:
1. Hippo-cerebellum
2. Hippo-callosal
3. Hippo-cortical
4. Hippo-thalamic

No. the answer is incorrect.
Score: 0

Accepted Answers:
- 2.

7) An independent variable is:
1. a variable in an experiment that varies independently.
2. a variable that is manipulated by the experimenter.
3. a variable that varies in response to variation of other variables in an experiment.
4. a variable that is not part of the experimental design.

No. the answer is incorrect.
Score: 0

Accepted Answers:
- 2.

8) What techniques are used to study cognitive processes?
1. Computed modeling
2. Hypothesizing
3. Eye movements
4. All of the above

No. the answer is incorrect.
Score: 0

Accepted Answers:
- 4.

9) All of the above
1. Computed modeling
2. Hypothesizing
3. Eye movements
4. All of the above

No. the answer is incorrect.
Score: 0

Accepted Answers:
- 4.

10) Hypotheses in the field of behaviorism are:
1. Descriptive
2. Non-empirical
3. Symbolic
4. All of the above

No. the answer is incorrect.
Score: 0

Accepted Answers:
- 4.
