Assignment 7

The due date for submitting this assignment has passed. As per our records you have not submitted this assignment.

1. The major role of the central executive function in the working memory is:
   - To allocate attention between tasks
   - Coordinate verbal and visual information
   - "To allocate attention between tasks" and "Coordinate verbal and visual information"
   - Coordinate auditory-sensory suppression

   No, the answer is incorrect.
   Score: 0
   Accepted Answers:
   - "To allocate attention between tasks" and "Coordinate verbal and visual information"

2. In Baddeley’s model of working memory model, which component is added to the original one?
   - Episodic buffer
   - Unavailable Sketch pad
   - Phonological loop
   - Control executive

   No, the answer is incorrect.
   Score: 0
   Accepted Answers:
   - Control executive

3. In Murdock (1964) serial position curve which was obtained as a result of recall of a list based on its position, recall was better at:
   - Words at the beginning
   - Words at the end
   - Words at the beginning and words at the end
   - Words in the middle

   No, the answer is incorrect.
   Score: 0
   Accepted Answers:
   - Words at the beginning and words at the end

4. From MTL’s sake we can understand that ______ is crucial for the formation of new long-term memory.
   - Fear indicates
   - Hypocampus
   - Cortical
   - Frontal lobe

   No, the answer is incorrect.
   Score: 0
   Accepted Answers:
   - Hypocampus

5. ______ occurs when the information caused by the printing stimulus is based on the meaning of the stimulus.
   - Positive printing
   - Repetition printing
   - Both Positive and Repetition printing
   - Conceptual printing

   No, the answer is incorrect.
   Score: 0
   Accepted Answers:
   - Conceptual printing

6. ______ following learning results in better memory than retesting material after learning.
   - Testing
   - Linking to self
   - Generation of information
   - All of the above

   No, the answer is incorrect.
   Score: 0
   Accepted Answers:
   - Generation of information

7. ______ is/are involved in memory and attempting to connect the new information with prior knowledge.
   - Maintenance rehearsal
   - elaboration rehearsal
   - Proposing rehearsal
   - Both Maintenance and Elaborative rehearsal

   No, the answer is incorrect.
   Score: 0
   Accepted Answers:
   - Both Maintenance and Elaborative rehearsal

8. ______ shows that memory performance is enhanced if the type of task at encoding matches the type of task at retrieval.
   - State dependent learning
   - Transfer appropriate processing
   - Meaning based encoding
   - Rhyming based encoding

   No, the answer is incorrect.
   Score: 0
   Accepted Answers:
   - Transfer appropriate processing
