   - Sympathetic
   - Autonomic system
   - Respiratory
   - Hemorrhagic classification

   **No, the answer is incorrect.**
   **Score: 0**

   **Accepted Answers:**
   - Sympathetic
   - Autonomic system
   - Respiratory
   - Hemorrhagic classification

7. A condition in which people can perceive the individual shapes and structures of objects and are able to integrate those into a representation of the whole object:

   - Perceptual agnosia
   - Associative agnosia
   - Conceptual agnosia
   - Apraxic agnosia

   **No, the answer is incorrect.**
   **Score: 0**

   **Accepted Answers:**
   - Perceptual agnosia
   - Associative agnosia
   - Conceptual agnosia
   - Apraxic agnosia

8. A syndrome involves the temporary suppression of distracting memories which are unanswerable to the patient of some subconscious level:

   - Organic amnesia
   - Psychogenic amnesia
   - Amnesia's
   - All of the above

   **No, the answer is incorrect.**
   **Score: 0**

   **Accepted Answers:**
   - Organic amnesia
   - Psychogenic amnesia
   - Amnesia's
   - All of the above

9. There are evidences which suggest that impairments of encoding and retrieval are independent of one another:

   - True
   - False

   **No, the answer is incorrect.**
   **Score: 0**

   **Accepted Answers:**
   - True
   - False

10. According to the theory, organic amnesia is visibly characterized by an impairment of ______:

    - Procedural memory
    - Declarative memory
    - Semantic memory
    - Working memory

    **No, the answer is incorrect.**
    **Score: 0**

    **Accepted Answers:**
    - Procedural memory
    - Declarative memory
    - Semantic memory
    - Working memory
