Unit 7 - Week 5: Language | Decision Making

Course outline

How to access the portal?

Testing the pre-requisites

Week 1 : Course Introduction and Knowledge

Week 2: Knowledge, Visual Imagery

Week 3 : Language

Week 4 : Language - II

Week 5: Language | Decision Making

● Lecture 21 - Aphasia

● Lecture 22: Bilingualism

● Lecture 23: Reasoning & Decision Making

● Lecture 24: Reasoning & Decision Making -II

● Lecture 25: Reasoning & Decision Making -III

○ Quiz : Week 5: Assignment 5

● Assignment 5 Solution

Week 5: Assignment 5

The due date for submitting this assignment has passed. **Due on 2018-03-14, 23:59 IST.**

Submitted assignment

1) Disruption of the ability to speak consisting of difficulties with word ordering, finding the right word and articulation is known as **1 point**

- Wernicke's aphasia
- Broca's aphasia
- Lichteim aphasia
- Conduction aphasia

No, the answer is incorrect.

Score: 0

Accepted Answers:

Broca's aphasia

2) When an individual displays deficits in comprehension & spontaneous speech and repetition is preserved. This is known as **1 point**

- Conduction aphasia
- Dysarthria
- Transcortical motor aphasia
- Speech Apraxia

No, the answer is incorrect.

Score: 0

Accepted Answers:

Transcortical motor aphasia

3) In Revised Hierarchical model (RHM) the semantic interference is more in _____ **1 point**

- Forward translation
- Backward translation
- No effects
- None of the above

No, the answer is incorrect.

Score: 0

Accepted Answers:

Forward translation

4) The Bilingual Interactive Activation (BIA) model doesn't have **1 point**

- Orthographic representations
- Phonological representations

Week 5
Feedback

Week 6 :
Problem Solving
| Creativity

Week 7 :
Cognition &
Emotion

Week 8:
Cognitive
Development

- Semantic representations
 All of the above

No, the answer is incorrect.
Score: 0

Accepted Answers:
Semantic representations

5) Read the following statement and say which syllogism is valid: I studied; therefore, I'll get good grade. **1 point**

- Denying the consequent
 Affirming the antecedent
 Affirming the consequent
 Denying the antecedent

No, the answer is incorrect.
Score: 0

Accepted Answers:
Affirming the antecedent

6) According to Cosmides and Tooby (1992), the results of the Wason Selection Task demonstrate that the human mind has not evolved reasoning procedures that are specialised for detecting logical violations of conditional rules. However, they found that subjects perform considerably better in _____ condition than they do with the standard test. **1 point**

- Cheating on social exchange
 Framing of the option
 Requirement of the heuristics
 All of the above

No, the answer is incorrect.
Score: 0

Accepted Answers:
Cheating on social exchange
