Assignment 8

The due date for submitting this assignment has passed.

As per our records you have not submitted this assignment.

1) Which According to the Revised Hierarchical Model (L1 is the dominant language and L2 is the weaker language) statement is correct?

- L1 --- L2 translations are faster than L2 --- L1 translations
- L1 --- L2 translations are faster than L2 --- L1 translations
- Both L1 --- L2 translations and L2 --- L1 translations are equally fast
- It is not possible to translate from L2 --- L1 without passing through the conceptual ideas.

You answer is incorrect.

Score: 6

Accepted Answers:

- L2 --- L1 translations are faster than L1 --- L2 translations

2) According to Fodor's (1983) Bilingual Language Production Model,

- Activation spreads similarly throughout the network of associated lemmas and phonological representations as soon as the conceptual representations get activated.
- The second lemma must be extracted before the first lemma must flow to the associated phonological representations.

You answer is correct.

Score: 6

Accepted Answers:

- The second lemma must be selected before activity must flow to the associated phonological representations

3) Does Bilingual Interactive Activation Model include the nodes which represent semantic information?

- Yes
- No

You answer is incorrect.

Score: 6

Accepted Answers:

- Yes

4) According to Conceptual Mediation Hypothesis, translation from L1 to L2, concept is first assessed through (L1 is the dominant language and L2 is the weaker language):

- L1
- L2

You answer is incorrect.

Score: 6

Accepted Answers:

- L2

5) Which of the following statements are false about Cognate Advantage?

- HA is component is larger for cognates than non-cognates.
- In picture naming and translation, bilinguals respond faster to cognates than non-cognates.
- Both
- None

You answer is incorrect.

Score: 6

Accepted Answers:

- None

6) In 1999, Waiser & Airport had reported that asymmetrical language switching costs were experienced by their participants. This finding:

- Supports the Language Switch Hypothesis.
- Opposes the Language Switch Hypothesis.
- Neither supports nor opposes the Language Switch Hypothesis.

You answer is incorrect.

Score: 6

Accepted Answers:

- Neither supports nor opposes the Language Switch Hypothesis.

7) Cognate Advantage

- Supports Bilingualism: i.e. for a bilingual, both the languages are active at the same time.
- Opposes Bilingualism: i.e. for a bilingual, both the languages are not active at the same time.
- Neither supports nor opposes Bilingualism.

You answer is incorrect.

Score: 6

Accepted Answers:

- Neither supports nor opposes Bilingualism.

8) Task Orientation System is included in

- BIA Model
- BIA+ Model
- Both BIA and BIA+
- Neither BIA and BIA+

You answer is incorrect.

Score: 6

Accepted Answers:

- Neither BIA and BIA+

9) Revised Hierarchical Model presists

- More semantic interference in backward translation than forward translation.
- More semantic interference in forward translation than backward translation.
- Equally semantic interference in forward and backward translations.
- No semantic interference at all.

You answer is incorrect.

Score: 6

Accepted Answers:

- More semantic interference in backward translation than forward translation.

10) Results of picture naming task experiment conducted by Peterson et al. in 1964 are in support of:

- Word Association Model
- Concept Mediation Model
- Both
- None

You answer is incorrect.

Score: 6

Accepted Answers:

- Concept Mediation Model.
