Assignment 5

Due on 2020-04-01, 23:59 IST.

The date for submitting this assignment has passed. As per our records you have not submitted this assignment.

1. A relatively permanent change in behavior caused by experience is known as _____________.
   - Learning
   - Sensory memory
   - Working Memory
   - Retrieval

   NS, the answer is incorrect.

   Score: 0
   Accepted Answers:
   - Learning

2. ________ refers to loss of memory for events and knowledge acquired prior to the lesion or injury to the brain.
   - Anterograde Amnesia
   - Retrodgrade Amnesia
   - Temporal gradient
   - Hippocampus

   NS, the answer is incorrect.

   Score: 0
   Accepted Answers:
   - Hippocampus

3. Which of the following is true?
   - The amplitude of the brain responses at different time-intervals can be used to index the duration of schizoid memory traces.
   - The neural model proposed that information can move from the short - term memory to the long term memory, if the items are not rehearsed.
   - Working Memory represents a limited capacity store for holding information over the short – term and for performing mental operations.
   - The content of working memory could be sourced from sensory memory.

   NS, the answer is incorrect.

   Score: 0
   Accepted Answers:
   - The content of working memory could be sourced from sensory memory.

4. ________ is supposed to be a mechanism for automatically encoding information in working memory.
   - express-swap pitch
   - visual memory trace
   - phonological loop
   - none of the above

   NS, the answer is incorrect.

   Score: 0
   Accepted Answers:
   - None of the above

5. Which of the following are the parts of the medial temporal lobe?
   - perirhinal cortex
   - entorhinal cortex
   - amygdala
   - hippocampus

   NS, the answer is incorrect.

   Score: 0
   Accepted Answers:
   - perirhinal cortex
   - entorhinal cortex
   - amygdala
   - hippocampus

6. Which syndrome could be triggered by physical exertion in men and emotional stress in women over the age of 50 years?
   - C57
   - Alzheimer
   - TGA
   - Dyslexia

   NS, the answer is incorrect.

   Score: 0
   Accepted Answers:
   - TGA

7. Match the following:

   A
   - hippocampal system
   - retrospatial system
   - PPC
   - neocortical system

   B
   - memory for items
   - standard consolidation theory
   - local psychological disorders
   - creating long-term memories

   NS, the answer is incorrect.

   Score: 0
   Accepted Answers:
   - Hippocampal system
   - Neocortical system

8. The temporal-parietal junction outside the medial temporal lobe has been deemed important for the permanent consolidation of ____________.
   - sensory information
   - semantic information
   - episodic memory
   - iconic memory

   NS, the answer is incorrect.

   Score: 0
   Accepted Answers:
   - Semantic information
