Assignment 2

The purpose of this assignment is to practice coding. All our marks need you to have completed the assignment.

Instructions:

1. Write a program that performs the following:
   a. Accepts the input of 10 values. Each value is a float.
   b. Calculates the sum of the values and prints the result.
   c. Calculates the average of the values and prints the result.
   d. Calculates the maximum and minimum values and prints the result.

2. Submit your program by the due date.

Due on 2020-11-12, 23:59 IST.

Possible Questions:

1. What is the purpose of this assignment?
2. How many values does the program accept?
3. What are the calculations performed on the values?
4. What is the due date for submission?

Assignment 2

Instructions:

1. Write a program that performs the following:
   a. Accepts the input of 10 values. Each value is a float.
   b. Calculates the sum of the values and prints the result.
   c. Calculates the average of the values and prints the result.
   d. Calculates the maximum and minimum values and prints the result.

2. Submit your program by the due date.

Due on 2020-11-12, 23:59 IST.

Possible Questions:

1. What is the purpose of this assignment?
2. How many values does the program accept?
3. What are the calculations performed on the values?
4. What is the due date for submission?

Assignment 2

Instructions:

1. Write a program that performs the following:
   a. Accepts the input of 10 values. Each value is a float.
   b. Calculates the sum of the values and prints the result.
   c. Calculates the average of the values and prints the result.
   d. Calculates the maximum and minimum values and prints the result.

2. Submit your program by the due date.

Due on 2020-11-12, 23:59 IST.

Possible Questions:

1. What is the purpose of this assignment?
2. How many values does the program accept?
3. What are the calculations performed on the values?
4. What is the due date for submission?

Assignment 2

Instructions:

1. Write a program that performs the following:
   a. Accepts the input of 10 values. Each value is a float.
   b. Calculates the sum of the values and prints the result.
   c. Calculates the average of the values and prints the result.
   d. Calculates the maximum and minimum values and prints the result.

2. Submit your program by the due date.

Due on 2020-11-12, 23:59 IST.

Possible Questions:

1. What is the purpose of this assignment?
2. How many values does the program accept?
3. What are the calculations performed on the values?
4. What is the due date for submission?

Assignment 2

Instructions:

1. Write a program that performs the following:
   a. Accepts the input of 10 values. Each value is a float.
   b. Calculates the sum of the values and prints the result.
   c. Calculates the average of the values and prints the result.
   d. Calculates the maximum and minimum values and prints the result.

2. Submit your program by the due date.

Due on 2020-11-12, 23:59 IST.

Possible Questions:

1. What is the purpose of this assignment?
2. How many values does the program accept?
3. What are the calculations performed on the values?
4. What is the due date for submission?

Assignment 2

Instructions:

1. Write a program that performs the following:
   a. Accepts the input of 10 values. Each value is a float.
   b. Calculates the sum of the values and prints the result.
   c. Calculates the average of the values and prints the result.
   d. Calculates the maximum and minimum values and prints the result.

2. Submit your program by the due date.

Due on 2020-11-12, 23:59 IST.

Possible Questions:

1. What is the purpose of this assignment?
2. How many values does the program accept?
3. What are the calculations performed on the values?
4. What is the due date for submission?

Assignment 2

Instructions:

1. Write a program that performs the following:
   a. Accepts the input of 10 values. Each value is a float.
   b. Calculates the sum of the values and prints the result.
   c. Calculates the average of the values and prints the result.
   d. Calculates the maximum and minimum values and prints the result.

2. Submit your program by the due date.

Due on 2020-11-12, 23:59 IST.

Possible Questions:

1. What is the purpose of this assignment?
2. How many values does the program accept?
3. What are the calculations performed on the values?
4. What is the due date for submission?

Assignment 2

Instructions:

1. Write a program that performs the following:
   a. Accepts the input of 10 values. Each value is a float.
   b. Calculates the sum of the values and prints the result.
   c. Calculates the average of the values and prints the result.
   d. Calculates the maximum and minimum values and prints the result.

2. Submit your program by the due date.

Due on 2020-11-12, 23:59 IST.

Possible Questions:

1. What is the purpose of this assignment?
2. How many values does the program accept?
3. What are the calculations performed on the values?
4. What is the due date for submission?

Assignment 2

Instructions:

1. Write a program that performs the following:
   a. Accepts the input of 10 values. Each value is a float.
   b. Calculates the sum of the values and prints the result.
   c. Calculates the average of the values and prints the result.
   d. Calculates the maximum and minimum values and prints the result.

2. Submit your program by the due date.

Due on 2020-11-12, 23:59 IST.

Possible Questions:

1. What is the purpose of this assignment?
2. How many values does the program accept?
3. What are the calculations performed on the values?
4. What is the due date for submission?

Assignment 2

Instructions:

1. Write a program that performs the following:
   a. Accepts the input of 10 values. Each value is a float.
   b. Calculates the sum of the values and prints the result.
   c. Calculates the average of the values and prints the result.
   d. Calculates the maximum and minimum values and prints the result.

2. Submit your program by the due date.

Due on 2020-11-12, 23:59 IST.

Possible Questions:

1. What is the purpose of this assignment?
2. How many values does the program accept?
3. What are the calculations performed on the values?
4. What is the due date for submission?
