Assignment 4

The data for submitting this assignment has passed.
As per our records you have not submitted this assignment.

1. Identify the type of variable that varies in response to a change in the other variable.
   - Qualitative
   - Quantitative
   - Ordinal
   - Continuous
   - Discrete
   - Categorical
   - Interval
   - Ratio
   
2. The condition for causality that makes the causes and effects occur together and vary together is called a
   - Strong relationship
   - Correlation
   - Causation
   - Association
   - Linear relationship
   - Random relationship
   - Non-linear relationship
   - None of these
   - More than two
   - Less than two
   
3. A scale for measurement uses labels or tags for identifying and classifying objects and does not reflect amount of characteristic possessed.
   - Nominal
   - Ordinal
   - Interval
   - Ratio
   - Continuous
   
4. The following question is asked in a survey:
   - Which is the flavor of KFC potato chips?
   a. French fries
   b. Fried chicken
   c. Neither agree nor disagree
   d. Yes
   e. Strongly disagree
   
5. The scale used for measurement is:
   - Dichotomous scale
   - Semantic differential scale
   - Likert scale
   - Nominal scale
   - Interval scale
   - Ratio scale
   - Continuous scale
   
6. A type of convenience sampling in which the respondents are selected on the basis of investigator's personal reliability of the respondents is:
   - Stratified sampling
   - Quota sampling
   - Random sampling
   - Snowball sampling
   - Group sampling
   - Judgmental sampling
   - Accidental sampling
   
7. A type of sampling scheme in which the entire审查 unit is treated as one sample is:
   - Simple random sampling
   - Systematic sampling
   - Stratified sampling
   - Cluster sampling
   - Quota sampling
   - Random sampling
   - Non-probability sampling
   - None of these
   
8. The data for submitting this assignment has passed.
   As per our records you have not submitted this assignment.

9. A snowball sampling scheme in which the entire population is divided into categories based on judgment or convenience:
   - Cluster sampling
   - Stratified sampling
   - Systematic sampling
   - Quota sampling
   - Random sampling
   - Non-probability sampling
   - Probability sampling
   - Accidental sampling
   
10. A snapshot of the assignment showing the question and response choices:
    - Multiple choice
    - Short answer
    - Short response
    - Long answer
    - Essay
    - Multiple response
    - Short response
    - Long answer
    - Essay

11. Internal validity of an experimental design relates to __________, and external validity of an experimental design relates to __________.
   - Controlling extraneous variables, Generalization of causality
   - Generalization of causality, Controlling extraneous variables
   - Randomization, Non-randomization
   - Randomization, Non-randomization
   - None of these
   - More than two
   - Less than two

Due on 2016-06-26, 23:09 IST.
