Assignment 7

The due date for submitting this assignment has passed.
As per our records you have not submitted this assignment.

1) A simulation expert wants to visualize the data generated from the simulation with multiple replications. Which of the following technique will be used by the expert if it is desired to keep the actual information in the data plot?

   - Histogram
   - Box Plot
   - Stem & Leaf Display
   - None of the above

   No, the answer is incorrect.
   Score: 0
   Accepted Answers:
   Stem & Leaf Display

2) In a manufacturing plant, all the machines required for the assembly of nut and bolt are placed sequentially to produce them in huge amount. Which of the following manufacturing layout is implemented in the plant?

   - Product Layout
   - Process Layout
   - Cellular Layout
   - Fixed Position layout

   No, the answer is incorrect.
   Score: 0
   Accepted Answers:
   Product Layout

3) In which of the following phases of the product lifecycle management the Plant Simulation software is useful?

   1. Planning phase
   2. Development phase
   3. Manufacturing phase
   4. Support phase

   - Planning phase and Development phase
   - Development phase and Manufacturing phase
   - Support phase only
   - Development phase only

   No, the answer is incorrect.
   Score: 0
   Accepted Answers:
   Development phase and Manufacturing phase

4) The stem in a stem & leaf diagram is a proxy for classes.

   - True
   - False

   No, the answer is incorrect.
   Score: 0
   Accepted Answers:
   True

5) The CAD/CAE facilitates the support phase in the product lifecycle management.

   - True
   - False

   No, the answer is incorrect.
   Score: 0
   Accepted Answers:
   False
