12. Compare and contrast the management of chronic diseases in different cultures. Explain how cultural beliefs and practices can influence the management of chronic diseases.

13. Discuss the role of genetics in the development of chronic diseases. Explain how genetic factors can contribute to the development of chronic diseases.

14. Explain the role of environmental factors in the development of chronic diseases. Describe specific environmental factors that can contribute to the development of chronic diseases.

15. Discuss the role of stress in the development of chronic diseases. Explain how stress can contribute to the development of chronic diseases.

16. Discuss the role of infectious agents in the development of chronic diseases. Describe specific infectious agents that can contribute to the development of chronic diseases.

17. Discuss the role of inherited factors in the development of chronic diseases. Explain how inherited factors can contribute to the development of chronic diseases.

18. Discuss the role of lifestyle factors in the development of chronic diseases. Describe specific lifestyle factors that can contribute to the development of chronic diseases.

19. Discuss the role of environmental factors in the development of chronic diseases. Explain how environmental factors can contribute to the development of chronic diseases.

20. Discuss the role of hereditary factors in the development of chronic diseases. Describe specific hereditary factors that can contribute to the development of chronic diseases.

21. Discuss the role of modifiable risk factors in the development of chronic diseases. Explain how modifiable risk factors can contribute to the development of chronic diseases.

22. Discuss the role of non-modifiable risk factors in the development of chronic diseases. Explain how non-modifiable risk factors can contribute to the development of chronic diseases.

23. Discuss the role of genetic factors in the development of chronic diseases. Explain how genetic factors can contribute to the development of chronic diseases.

24. Discuss the role of environmental factors in the development of chronic diseases. Describe specific environmental factors that can contribute to the development of chronic diseases.

25. Discuss the role of lifestyle factors in the development of chronic diseases. Explain how lifestyle factors can contribute to the development of chronic diseases.

26. Discuss the role of hereditary factors in the development of chronic diseases. Describe specific hereditary factors that can contribute to the development of chronic diseases.

27. Discuss the role of modifiable risk factors in the development of chronic diseases. Explain how modifiable risk factors can contribute to the development of chronic diseases.

28. Discuss the role of non-modifiable risk factors in the development of chronic diseases. Explain how non-modifiable risk factors can contribute to the development of chronic diseases.

29. Discuss the role of genetic factors in the development of chronic diseases. Explain how genetic factors can contribute to the development of chronic diseases.

30. Discuss the role of environmental factors in the development of chronic diseases. Describe specific environmental factors that can contribute to the development of chronic diseases.

31. Discuss the role of lifestyle factors in the development of chronic diseases. Explain how lifestyle factors can contribute to the development of chronic diseases.

32. Discuss the role of hereditary factors in the development of chronic diseases. Describe specific hereditary factors that can contribute to the development of chronic diseases.

33. Discuss the role of modifiable risk factors in the development of chronic diseases. Explain how modifiable risk factors can contribute to the development of chronic diseases.

34. Discuss the role of non-modifiable risk factors in the development of chronic diseases. Explain how non-modifiable risk factors can contribute to the development of chronic diseases.

35. Discuss the role of genetic factors in the development of chronic diseases. Explain how genetic factors can contribute to the development of chronic diseases.
