Week 6
Assignments

Section A: The Natural Environment

1. What do you think is the relationship between the economy and the natural environment? How can we ensure a sustainable future?

2. How do natural resources help in the development of industries? Discuss with an example.

3. What are the main threats to biodiversity, and how can we mitigate them?

Section B: Environmental Impact

1. What are the main environmental impacts of industrial activities, and how can they be reduced?

2. How can renewable energy sources contribute to sustainable development?

Assignment 6: The Natural Environment and Sustainability

1. a) Define the concept of sustainability and its relevance to the natural environment.

2. b) Discuss the role of renewable energy sources in achieving sustainability.

3. c) Explain the importance of conserving natural resources for future generations.

4. d) Describe the impact of deforestation on the global climate and biodiversity.

5. e) Discuss the role of environmental education in promoting sustainable practices.

6. f) Explain the concept of circular economy and its potential for sustainability.

7. g) Analyze the role of technology in addressing environmental challenges.

8. h) Discuss the importance of international cooperation in addressing global environmental issues.

9. i) Explain the concept of the green revolution and its implications for sustainable agriculture.

10. j) Discuss the role of community participation in achieving sustainable development.

Assignment 6: The Natural Environment and Sustainability

1. a) Define the concept of sustainability and its relevance to the natural environment.

2. b) Discuss the role of renewable energy sources in achieving sustainability.

3. c) Explain the importance of conserving natural resources for future generations.

4. d) Describe the impact of deforestation on the global climate and biodiversity.

5. e) Discuss the role of environmental education in promoting sustainable practices.

6. f) Explain the concept of circular economy and its potential for sustainability.

7. g) Analyze the role of technology in addressing environmental challenges.

8. h) Discuss the importance of international cooperation in addressing global environmental issues.

9. i) Explain the concept of the green revolution and its implications for sustainable agriculture.

10. j) Discuss the role of community participation in achieving sustainable development.

Assignment 6: The Natural Environment and Sustainability

1. a) Define the concept of sustainability and its relevance to the natural environment.

2. b) Discuss the role of renewable energy sources in achieving sustainability.

3. c) Explain the importance of conserving natural resources for future generations.

4. d) Describe the impact of deforestation on the global climate and biodiversity.

5. e) Discuss the role of environmental education in promoting sustainable practices.

6. f) Explain the concept of circular economy and its potential for sustainability.

7. g) Analyze the role of technology in addressing environmental challenges.

8. h) Discuss the importance of international cooperation in addressing global environmental issues.

9. i) Explain the concept of the green revolution and its implications for sustainable agriculture.

10. j) Discuss the role of community participation in achieving sustainable development.

Assignment 6: The Natural Environment and Sustainability

1. a) Define the concept of sustainability and its relevance to the natural environment.

2. b) Discuss the role of renewable energy sources in achieving sustainability.

3. c) Explain the importance of conserving natural resources for future generations.

4. d) Describe the impact of deforestation on the global climate and biodiversity.

5. e) Discuss the role of environmental education in promoting sustainable practices.

6. f) Explain the concept of circular economy and its potential for sustainability.

7. g) Analyze the role of technology in addressing environmental challenges.

8. h) Discuss the importance of international cooperation in addressing global environmental issues.

9. i) Explain the concept of the green revolution and its implications for sustainable agriculture.

10. j) Discuss the role of community participation in achieving sustainable development.

Assignment 6: The Natural Environment and Sustainability

1. a) Define the concept of sustainability and its relevance to the natural environment.

2. b) Discuss the role of renewable energy sources in achieving sustainability.

3. c) Explain the importance of conserving natural resources for future generations.

4. d) Describe the impact of deforestation on the global climate and biodiversity.

5. e) Discuss the role of environmental education in promoting sustainable practices.

6. f) Explain the concept of circular economy and its potential for sustainability.

7. g) Analyze the role of technology in addressing environmental challenges.

8. h) Discuss the importance of international cooperation in addressing global environmental issues.

9. i) Explain the concept of the green revolution and its implications for sustainable agriculture.

10. j) Discuss the role of community participation in achieving sustainable development.
