Assignment 10

Due on 2020-04-06, 23:59 IST.

1. You have no trouble ordering, you have no problem with supply, data.
   A) True
   B) False

2. If you have ordered less, you have no trouble with supply, data.
   A) True
   B) False

3. Information distortion or exaggeration of demand does not lead to bullwhip effect.
   A) True
   B) False

4. One reason why demand-supply mismatch happens is because production happens in singles.
   A) True
   B) False

5. Bullwhip effect can be measured by measuring standard deviation.
   A) True
   B) False

6. Mumbai Dabbawallas delivery system is an excellent example of coordination.
   A) True
   B) False

7. Dabbawallas do this for the Mumbai Dabbawallas.
   A) an example of coordination
   B) how six sigma operates
   C) why six sigma should operate
   D) none of the above

8. All but one of the coordination elements:
   A) logistic coordination
   B) incentive alignment
   C) vehicle loading
   D) collective learning

9. The supplier and buyer of a process is defined by:
   A) customer
   B) supplier
   C) all of the above

10. Organizations strive to achieve a Cpk value of:
    A) 1
    B) 2
    C) 3
    D) 4

11. If the target (T) is different from Mean (μ), the Process Capability Index is:
    A) A 1
    B) A 2
    C) 3
    D) 4

12. The 6 sigma process, if the target (T) is different from Mean (μ), the Process Capability Index is:
    A) A 1
    B) A 2
    C) 3
    D) 4

13. The 6 sigma process, if the target (T) is different from Mean (μ), the Process Capability Index is:
    A) A 1
    B) A 2
    C) 3
    D) 4
