1) DSS is an interactive system in a networked environment that helps a targeted group of managers make decisions. 1 point
   - A) TRUE
   - B) FALSE
   
   No. the answer is incorrect
   Score: 0
   Accepted Answers:
   A) TRUE

2) Non-Programmed decisions deals with the problem solver understands no elements or relationships between elements. 1 point
   - A) TRUE
   - B) FALSE
   
   No. the answer is incorrect
   Score: 0
   Accepted Answers:
   A) TRUE

3) Model Management System stores and accesses models that managers use to make decisions. 1 point
   - A) TRUE
   - B) FALSE
   
   No. the answer is incorrect
   Score: 0
   Accepted Answers:
   A) TRUE

4) Representational models perform the logical processing leading to a specific suggested decision for a fairly structured or well-understood task. 1 point
   - A) TRUE
   - B) FALSE
   
   No. the answer is incorrect
   Score: 0
   Accepted Answers:
   A) TRUE

5) Suggestion models provide guidelines for action by generating an optimal solution consistent with a series of constraints. 1 point
   - A) TRUE
   - B) FALSE
   
   No. the answer is incorrect
   Score: 0
   Accepted Answers:
   A) TRUE

6) Decision at the operational level tend to be more: 1 point
   - A) Programmed decision
   - B) Non-programmed decisions
   - C) Tactical decision
   - D) Strategic decision
   
   No. the answer is incorrect
   Score: 0
   Accepted Answers:
   A) Programmed decision

7) The basic component(s) of DSS are:
   
   - A) Model base
   - B) Data base
   - C) Document base
   - D) All of these
   
   No. the answer is incorrect
   Score: 0
   Accepted Answers:
   A) Model base

8) In which of the following types of analysis, the manipulation of data by computerized tools tailored to a specific task and setting? 1 point
   - A) What-if analysis
   - B) Optimization analysis
   - C) Data analysis
   - D) Information systems analysis
   
   No. the answer is incorrect
   Score: 0
   Accepted Answers:
   A) What-if analysis

9) The components of the decision support system (DSS).
   
   - A) Database management system
   - B) Model management system
   - C) Support tools
   - D) All of these
   
   No. the answer is incorrect
   Score: 0
   Accepted Answers:
   A) Database management system

10) .......... supports decision making by analyzing given time-series data and retrieving new information gained by those analysis. 1 point

   - A) Model-driven DSS
   - B) Data-driven DSS
   - C) Document-driven DSS
   - D) None of these.
   
   No. the answer is incorrect
   Score: 0
   Accepted Answers:
   A) Model-driven DSS
