Assignment 2
Due on 2019-04-25, 23:59:59

Task 1
Case:A manufacturer of audio speakers needs to purchase 1,000 speakers to stock in their warehouse. The current market price is $50 per speaker. The company plans to sell each speaker for $100.

Task 2
The company has a contract with a supplier to purchase speakers at a discounted rate of $45 per speaker. The company needs to determine if it is more cost-effective to purchase from the supplier or to purchase from the market.

Task 3
The company has budgeted $40,000 for advertising expenses for the year. The budget is divided into three categories: online advertising, social media marketing, and print advertising. The budget for online advertising is $15,000, the budget for social media marketing is $10,000, and the remaining budget is for print advertising.

Task 4
The company has a budget of $50,000 for employee training. The budget is divided into two categories: internal training and external training. The budget for internal training is $30,000, and the remaining budget is for external training.

Task 5
The company has a budget of $100,000 for equipment purchases. The budget is divided into three categories: computers, printers, and other equipment. The budget for computers is $40,000, the budget for printers is $30,000, and the remaining budget is for other equipment.
