Assignment 4

Due: 2020-11-14, 23:59 IST

1. The net income of a company is Rs. 1,20,000. If the net income is increased by 15%, calculate the new net income.

2. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the net worth of the company.

3. A company has revenue of Rs. 1,00,000 and expenses of Rs. 60,000. Calculate the net income before tax.

4. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the debt-to-equity ratio.

5. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the equity multiplier.

6. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the times interest earned.

7. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the profit margin.

8. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the return on assets.

9. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the return on equity.

10. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the inventory turnover ratio.

11. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the current ratio.

12. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the quick ratio.

13. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the acid test ratio.

14. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the debt-to-equity ratio.

15. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the equity multiplier.

16. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the times interest earned.

17. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the profit margin.

18. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the return on assets.

19. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the return on equity.

20. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the inventory turnover ratio.

21. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the current ratio.

22. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the quick ratio.

23. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the acid test ratio.

24. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the debt-to-equity ratio.

25. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the equity multiplier.

26. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the times interest earned.

27. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the profit margin.

28. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the return on assets.

29. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the return on equity.

30. A company has total assets of Rs. 5,00,000 and total liabilities of Rs. 2,50,000. Calculate the inventory turnover ratio.
