Assignment 3

The due date for submitting this assignment has passed.
As per our records you have not submitted this assignment. Due on 2019-02-20, 23:59 IST.

1) ...........................is a small group brought together and guided by a moderator through an unstructured, spontaneous discussion for the purpose of gaining information relevant to the research problem

- Depth interview
- Focus group
- Projective technique
- None of the above

No, the answer is incorrect.
Score: 0
Accepted Answers:
Focus group

2) Which of the following is not the objective of exploratory research?

- Gain background information
- Clarify problems and hypothesis
- Establish research priorities
- Make conclusion

No, the answer is incorrect.
Score: 0
Accepted Answers:
Make conclusion

3) .................is a set of advance decisions that make up the master plan specifying the methods and procedures for collecting and analyzing the needed information.

- Research frame.
- Research skeleton

No, the answer is incorrect.
Score: 0
Accepted Answers: No, the answer is incorrect.
4) Repeatedly measure the same sample units of a population over time.  
- Cross-sectional research.
- Longitudinal research.
- Exploratory research.
- All the above.

No, the answer is incorrect.
Score: 0
Accepted Answers:
Longitudinal research.

5) Which of the following is not the condition of causality?  
- Time order of occurrence of variables.
- Elimination of other possible causal factors.
- Cyclical variation.
- Concomitant variation.

No, the answer is incorrect.
Score: 0
Accepted Answers:
Cyclical variation.

6) Are all variables other than the independent variables that affect the response of the test units  
- Dependent variable.
- Extraneous variables
- Predictor variables.
- Outcome variables.

No, the answer is incorrect.
Score: 0
Accepted Answers:
Extraneous variables

7) Specific events that are external to the experiment but that occur at the same time as the experiment.  
- Maturation.
- History.
- Instrumentation.
- Selection bias.

No, the answer is incorrect.
Score: 0
Accepted Answers:
History.

8) A determination of whether the cause-and-effect relationships found in the experiment can be generalised is called  
- Internal reliability.
- External reliability.
9) Solomon four group design is the type of which experimental design.  

- Pre experimental.  
- True experimental.  
- Quasi experimental.  
- Statistical.  

No, the answer is incorrect.  
Score: 0  
Accepted Answers:  
External validity.

10) A method of controlling extraneous variables that involves matching test units on a set of key background variables before assigning them to the treatment conditions is called  

- Randomisation.  
- Matching.  
- Statistical control.  
- Design control.  

No, the answer is incorrect.  
Score: 0  
Accepted Answers:  
Matching.
