5. Which of the following statements is true concerning problem identification?
   1 point
   - Problems are generally obvious.  
   - A symptom and a problem are basically the same.  
   - Well-trained managers generally agree on what is considered a problem.  
   - The problem must be such that it exerts some type of pressure on the manager to act.
   No, the answer is incorrect. 
   Score: 0
   Accepted Answers:
   - The problem must be such that it exerts some type of pressure on the manager to act.

5. When decision makers seek out information that confirms their past choices and discount information that contradicts past judgments, they are exhibiting:
   1 point
   - availability bias  
   - confirmation bias  
   - anchoring effect  
   - self-serving bias  
   No, the answer is incorrect. 
   Score: 0
   Accepted Answers:
   - confirmation bias

3. Non-programmed decisions are typically made under a condition of:
   1 point
   - certainty  
   - low levels of risk  
   - uncertainty  
   - reliability  
   No, the answer is incorrect. 
   Score: 0
   Accepted Answers:
   - uncertainty

6. Lower-level managers typically confront which type of decision-making?
   1 point
   - programmed  
   - nonprogrammed  
   - unique  
   - non-programmed
   No, the answer is incorrect. 
   Score: 0
   Accepted Answers:
   - non-programmed

7. When problems are frequently managed not right on ________ in order to develop unique solutions.
   1 point
   - structured; non-programmed decision-making  
   - structured; pure intuition  
   - unstructured; non-programmed decision-making  
   - unstructured; programmed decision-making
   No, the answer is incorrect. 
   Score: 0
   Accepted Answers:
   - unstructured; non-programmed decision-making

8. Which of the following problems are straightforward, familiar, and easily defined?
   1 point
   - Unstructured problems  
   - Structured problems  
   - Unique problems  
   - Non-programmed problems
   No, the answer is incorrect. 
   Score: 0
   Accepted Answers:
   - Structured problems

9. Initiative decision-making is:
   1 point
   - not allowed in organizations  
   - a conscious process based on accumulated judgment  
   - making decisions based on experience, feelings, and accumulated judgment  
   - important in suppressing escalation of commitment
   No, the answer is incorrect. 
   Score: 0
   Accepted Answers:
   - important in suppressing escalation of commitment

10. Statement 1: The processing effort decreases when decision makers have an initial information as a starting point and then, once set, they fall to a point adequately reflect for subsequent information. 
    Statement 2: The availability bias describes when decision makers try to arrange meaning out of random events.
    1 point
    - Statement 1 is correct, statement 2 is incorrect
    - Both statements are correct
    - Statement 1 is incorrect, statement 2 is correct
    - Both statements are incorrect
    No, the answer is incorrect. 
    Score: 0
    Accepted Answers:
    - Both statements are incorrect
