Unichord Laser Easing Equations. The unichord equation of motion is a uniform rotating linear homogeneous system of constant depth 1, a = b = c = 0, and the angle of attack is given by the steady-state angle of attack. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

1. The steady-state solution is a constant solution, written as $y_0$. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

2. The steady-state solution is a constant solution, written as $y_0$. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

3. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

4. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

5. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

6. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

7. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

8. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

9. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

10. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

11. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

12. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

13. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

14. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

15. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

16. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

17. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

18. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

19. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

20. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

21. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

22. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

23. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

24. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

25. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

26. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

27. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

28. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

29. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.

30. The unichord solution satisfies: $y(t) = y_0 e^{at} + y_1 t e^{at}$.
