Assignment 2

Exercise 1.1

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.2

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.3

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.4

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.5

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.6

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.7

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.8

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.9

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.10

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.11

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.12

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.13

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.14

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.15

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.16

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.17

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.18

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.19

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.20

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.21

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.22

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.23

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.24

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.25

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.26

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.27

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.28

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.29

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.

Exercise 1.30

1. Let $X$ be a random variable with distribution function $F_X(x)$.

2. Let $X$ be a random variable with distribution function $F_X(x)$.
