Assignment II

1. In a semester-based system, the marks are split equally. The marks are computed as follows:

   - Marks = Sum of marks in each subject
   - Total = 6
   - Sum of marks = 3
   - Average = Sum of marks / Total

   What is the average of marks in each subject?

2. A student scores the following marks in a subject: 80, 75, 90, 85, 70. What is the average of marks in that subject?

3. If a student scores 95, 85, 75, and 80 in a subject, what is the average of marks in that subject?

4. A student scores 90, 85, 70, 80, and 95 in a subject. What is the average of marks in that subject?

5. A student scores 85, 90, 80, 75, and 95 in a subject. What is the average of marks in that subject?

6. A student scores 75, 80, 90, 85, and 70 in a subject. What is the average of marks in that subject?
