As per our records you have not submitted this assignment.

1. The size of the abrasive particle is ________ 1 point
   - Circular
   - Triangular
   - Random
   - Square
   Ro, the answer is incorrect.
   Accepted Answers:
   - Random

2. Which operation is used for finishing the inside surface of a hole? 1 point
   - Grinding
   - Honing
   - Lapting
   - Polish polishing
   Ro, the answer is incorrect.
   Accepted Answers:
   - Honing

3. Conforming to ________ grinding process. 1 point
   - Conventional
   - Non-conventional
   - Advance
   - None of the above
   Ro, the answer is incorrect.
   Accepted Answers:
   - Conventional

4. Lapping is not suitable for ________ 1 point
   - Aluminum
   - Tungsten
   - Steel
   - Copper
   Ro, the answer is incorrect.
   Accepted Answers:
   - Tungsten

5. Water jet machining (WJM) and abrasive water jet machining (AWJM) belong to which of the following group of non-traditional process. 1 point
   - Thermal process
   - Electrical process
   - Mechanical process
   - Chemical process
   Ro, the answer is incorrect.
   Accepted Answers:
   - Chemical process

6. Magnetic field lines move from ________ 1 point
   - North to South
   - South to North
   - West to East
   - East to West
   Ro, the answer is incorrect.
   Accepted Answers:
   - North to South

7. Martensite transformation is ________ 1 point
   - Diffusion less
   - Second order transformation
   - Shaken less
   - Long range diffusion of atoms
   Ro, the answer is incorrect.
   Accepted Answers:
   - Diffusion less

8. If carbon content is increased than the hardness of martensite is ________ 1 point
   - Decreases
   - Remains constant
   - First increases then decreases
   - Increases
   Ro, the answer is incorrect.
   Accepted Answers:
   - Increases

9. Which of the following material cannot be machined using electro discharge machine? 1 point
   - Iron
   - Brass
   - Wood
   - Magnesium
   Ro, the answer is incorrect.
   Accepted Answers:
   - Wood

10. Cutting fluids are used to ________ 1 point
    - To cool the cutting tool and the workpiece
    - Help to carry away the chips
    - Prevent the work against rusting
    - All of the above
   Ro, the answer is incorrect.
   Accepted Answers:
   - All of the above
