Assignment 9

The data obtained in the assignment has been processed as follows:

6. The experiment was conducted on a white mouse and was shown in three fifies. What are your observations about the data from the figures?

7. Explain the results of the experiment.

8. Design an experiment to verify the results.

9. Discuss the implications of the results.

10. Evaluate the ethical considerations of the experiment.

11. Propose a hypothesis to explain the results.

12. Conduct a literature review on the topic.
