6. The current team needs to be carefully considered before proceeding with the implementation.

7. The current team needs to be carefully considered before proceeding with the implementation.

8. The current team needs to be carefully considered before proceeding with the implementation.

9. The current team needs to be carefully considered before proceeding with the implementation.

10. The current team needs to be carefully considered before proceeding with the implementation.

11. The current team needs to be carefully considered before proceeding with the implementation.

12. The current team needs to be carefully considered before proceeding with the implementation.

13. The current team needs to be carefully considered before proceeding with the implementation.

14. The current team needs to be carefully considered before proceeding with the implementation.

15. The current team needs to be carefully considered before proceeding with the implementation.

16. The current team needs to be carefully considered before proceeding with the implementation.

17. The current team needs to be carefully considered before proceeding with the implementation.

18. The current team needs to be carefully considered before proceeding with the implementation.

19. The current team needs to be carefully considered before proceeding with the implementation.

20. The current team needs to be carefully considered before proceeding with the implementation.

21. The current team needs to be carefully considered before proceeding with the implementation.

22. The current team needs to be carefully considered before proceeding with the implementation.

23. The current team needs to be carefully considered before proceeding with the implementation.

24. The current team needs to be carefully considered before proceeding with the implementation.

25. The current team needs to be carefully considered before proceeding with the implementation.

26. The current team needs to be carefully considered before proceeding with the implementation.

27. The current team needs to be carefully considered before proceeding with the implementation.

28. The current team needs to be carefully considered before proceeding with the implementation.

29. The current team needs to be carefully considered before proceeding with the implementation.

30. The current team needs to be carefully considered before proceeding with the implementation.

31. The current team needs to be carefully considered before proceeding with the implementation.

32. The current team needs to be carefully considered before proceeding with the implementation.

33. The current team needs to be carefully considered before proceeding with the implementation.

34. The current team needs to be carefully considered before proceeding with the implementation.

35. The current team needs to be carefully considered before proceeding with the implementation.

36. The current team needs to be carefully considered before proceeding with the implementation.

37. The current team needs to be carefully considered before proceeding with the implementation.

38. The current team needs to be carefully considered before proceeding with the implementation.

39. The current team needs to be carefully considered before proceeding with the implementation.

40. The current team needs to be carefully considered before proceeding with the implementation.

41. The current team needs to be carefully considered before proceeding with the implementation.

42. The current team needs to be carefully considered before proceeding with the implementation.

43. The current team needs to be carefully considered before proceeding with the implementation.

44. The current team needs to be carefully considered before proceeding with the implementation.

45. The current team needs to be carefully considered before proceeding with the implementation.

46. The current team needs to be carefully considered before proceeding with the implementation.

47. The current team needs to be carefully considered before proceeding with the implementation.

48. The current team needs to be carefully considered before proceeding with the implementation.

49. The current team needs to be carefully considered before proceeding with the implementation.

50. The current team needs to be carefully considered before proceeding with the implementation.
